Each chapter examines events throughout a woman's life cycle: puberty, menstruation, sexuality, marriage, and motherhood, and the health problems connected to them: infertility, birth control, and abortion, gynaecology, cancer, nervous disorders, and menopause. Mitchinson provides a sensitive understanding of the physician-patient relationship, the unease of many doctors about the bodies of their female patients, as well as overriding concerns about the relationship between female and male bodies. Throughout the book, Mitchinson takes care to examine the roles and agency of both patients and practitioners as diverse individuals.
