Practical Spoken Dialog Systems:

Practical Spoken Dialog Systems Deborah Dahl, 2007-09-28 For professional speech researchers there is a rich technical literature covering many years of primary research in speech. However, this literature is not necessarily applicable to the needs of business people, application developers, and students who are interested in learning about the practical uses of speech technology. On the other hand, while existing introductory resources cover the basic mechanics of development of application development as well as aspects of the voice user interface, they don't go far enough in dealing with the details that have to be taken into account to make spoken dialog systems successful in practice. What's missing is information in between the in-depth technical literature and the more introductory development resources. The goal of this book is to provide information for anyone who wants to take the next step beyond the basics of current speech applications but isn't yet ready to dive into the technical literature. It is hoped that this book will help project managers, application developers, and students gain a fuller and more complete understanding of spoken dialog technology and the practical aspects of developing and deploying spoken dialog applications.

Spoken Dialogue Systems Technology and Design Wolfgang Minker, Gary Geunbae Lee, Satoshi Nakamura, Joseph Mariani, 2010-11-09 Spoken Dialogue Systems Technology and Design covers key topics in the field of spoken language dialogue interaction from a variety of leading researchers. It brings together several perspectives in the areas of corpus annotation and analysis, dialogue system construction as well as theoretical perspectives on communicative intention, context-based generation and modelling of discourse structure. These topics are all part of the general research and development within the area of discourse and dialogue, with an emphasis on dialogue systems, corpora and corpus tools, and semantic and pragmatic modelling of discourse and dialogue.

Advances in Commercial Deployment of Spoken Dialog Systems David Suendermann, 2011-06-04 Advances in Commercial Deployment of Spoken Dialog Systems covers the peculiarities of commercial deployments of

spoken dialog systems from the tools standards and design principles to build them the infrastructure to deploy them techniques to monitor evaluate and analyze them and most importantly effective strategies to adapt tune and optimize them The book shows to what extent academic spoken dialog system research converges with real world applications This academic and practical synergy can be leveraged to build successful and robust spoken dialog applications that are useful when dealing with the dynamics of the ever changing future user

Situated Dialog in Speech-Based Human-Computer Interaction Alexander Rudnicky, Antoine Raux, Ian Lane, Teruhisa Misu, 2016-04-20 This book provides a survey of the state of the art in the practical implementation of Spoken Dialog Systems for applications in everyday settings It includes contributions on key topics in situated dialog interaction from a number of leading researchers and offers a broad spectrum of perspectives on research and development in the area In particular it presents applications in robotics knowledge access and communication and covers the following topics dialog for interacting with robots language understanding and generation dialog architectures and modeling core technologies and the analysis of human discourse and interaction The contributions are adapted and expanded contributions from the 2014 International Workshop on Spoken Dialog Systems IWSDS 2014 where researchers and developers from industry and academia alike met to discuss and compare their implementation experiences analyses and empirical findings

Natural Language Dialog Systems and Intelligent Assistants G.G. Lee, H.K. Kim, M. Jeong, J.-H. Kim, 2015-09-28 This book covers state of the art topics on the practical implementation of Spoken Dialog Systems and intelligent assistants in everyday applications It presents scientific achievements in language processing that result in the development of successful applications and addresses general issues regarding the advances in Spoken Dialog Systems with applications in robotics knowledge access and communication Emphasis is placed on the following topics speaker language recognition user modeling simulation evaluation of dialog system multi modality emotion recognition from speech speech data mining language resource and databases machine learning for spoken dialog systems and educational and healthcare applications
