**The Effective Clinical Neurologist** Louis R. Caplan, Joshua Hollander, 2010-10 The Effective Clinical Neurologist presents the most systematic guide available for the doctor or medical student learning the art of the neurological examination and treatment. The patient centered method is presented in logical steps, walking the reader through the process in a clear and detailed yet personal style. The authors begin by placing neurological medicine in its current cultural and economic environment and progress to presenting the specific process of interacting with the patient. This book is the only guide to the art of achieving optimal doctor/patient interaction and communication, which are essential to the practicing neurologist. The third edition of this classic reference is fully updated to include the impact of electronic communication and to incorporate the many technological advances that can be applied to the neurological evaluation. Other changes in the environment in which the clinician practices include the changes in procedure brought about by managed care. This edition is organized into four parts, beginning with a section on the clinician, neurologist, and the scope, methods, and uniqueness of this area of medicine. Part II focuses on the patient encounter, the taking of a history, systemic and neurological examination, interpretation of tests, giving the patient information, and conducting the dismissal interview. Case examples

illustrate the methods discussed Part III presents the various types of encounters that occur including those that involve inpatient care outpatient care consultations and the inclusion of medical students and other trainees Medico legal aspects of neurological care are also presented Part IV concludes with a summing up of the approach to patient care that is presented in the book and offers 10 Commandments of Doctoring Cumulated Index Medicus ,1999 Pharmacotherapeutics for Advanced Practice Virginia Poole Arcangelo,Andrew M. Peterson,2006 This advanced pharmacotherapeutics text for nurse practitioners and physician assistants offers guidelines on prescribing drugs for over 50 common diseases and disorders The book is organized by disorder rather than drug class and includes algorithms and case studies that illustrate critical thinking aspects of prescribing such as drug selection lifespan considerations therapeutic drug monitoring adverse reactions unexpected outcomes and when to change therapy This Second Edition has new chapters on oncologic disorders and complementary and alternative medicines Improved case studies reflect more realistic practice issues in decision making Additional areas addressed include food drug interactions dietary considerations and concerns regarding geriatric patients
