the origins of action learning with Reg Revans ideas and looks at their development and application today Action learning is self directed learning through tackling business and work problems with the support of peers and colleagues A professional and diverse workforce attracted influenced and developed in this way is more able to deal effectively with the growing complexity and pressures of working life As the limits of conventional training and development become more obvious leaders are increasingly attracted to action based approaches to learning when seeking better outcomes and returns on investment

Psychological Applications in Management Tomi L. Wahlstrom, 1999-04

oday s business environment requires more effective leadership than ever In the constantly changing business environment the leader has the central responsibility of keeping people motivated and productive Many companies have been downsizing and laying off employees and leaving behind employees with a wounded morale To lift this morale the leader needs to possess characteristics and qualities that cannot be learned from courses taken in business schools alone These characteristics and qualities can only be learned from life itself in an individual journey of individuation The leader needs to undergo an initiation process from immature psychology to mature psychology Traditionally this process is what makes men out of boys and women out of girls In analytical psychology this journey is called the hero s journey which is based on the hero myth and includes several different initiations and growing steps This study investigates the different initiations included in the hero s journey and the importance of learning how from them to be a responsible effective charismatic and powerful leader The study also illustrates the archetypes a term developed by Dr Carl Jung 1959 to describe the original patterns that guide our behavior involved in the hero s journey and what is required to get through the journey Heroism is not discussed here in the overall sense in which the public defines heroism As such this study does not investigate what motivates people to risk and or sacrifice their lives by attempting to save people from crashed airplanes Although this aspect of sacrifice is always present in heroism this aspect is just one of the many aspects of heroism Neither a heroic act of saving lives nor being celebrated on the covers of a national newspaper is required to be recognized as a hero Individuals are all heroes in their own way Some individuals manifest their heroism in very silent ways introversion while other individuals seem always to be in the public eye extroversion The essence of heroism always involves taking a journey into the unknown and bringing some sort of knowledge out of the unknown that benefits either society or an organization The hero brings new prosperity to the organizational wasteland Heroism in mass media and movie entertainment is very different from heroism in the psychological sense and in the mythological sense although there are some similar elements The basic elements of the hero the villain and the fair maiden are always present in popular movies but the steps of the hero s journey are often not involved which leaves nothing more than a meaningless plot good only for entertainment purposes These types of movies can steal an individual s sense of understanding of both the myth and the purpose of the hero s journey This study is neither discussing the heroes of our popular culture nor is this a study of Hollywood s creations or of celebrated athletes or even of famed political and war

heroes The focus within this study is a hero's journey in the career of a leader and how the journey can bring the light individuation into the darkness of the organizational wasteland The legacy of Roberto Goizueta who died in October 1997 during the writing of this dissertation is also acknowledged While his death in itself does not change the conclusions of this dissertation his contribution to the Coca Cola Company's success in traveling the hero's journey has been enormous It remains to be seen what the future brings to this great company after losing such a charismatic and heroic leader

Measuring Business Excellence Gopal K. Kanji, 2012-10-12 Business Excellence and Total Quality Management TQM models provide a means of measuring the satisfaction of customers employees and shareholders simultaneously A number of such models currently exist but the author argues none of these address all dimensions of TQM This book introduces the principles of TQM and establishes their use in measuring Business Excellence in an organisational environment It comparatively evaluates various TQM and Business Excellence models and discusses the complexities of measuring success Presenting important innovative work by one of the most eminent scholars in the field this book is essential reading for both academics and professionals working in quality management
