## **Practising Translation In Renaissance France The Example Of Etienne Dolet:**

*Practising Translation in Renaissance France* Valerie Worth, 1988 Translation was one important aspect of the concept of imitatio the imitation of classical models which dominated the literary scene in Renaissance France This first study of the practice as opposed to the theory of translation among French writers looks at the work and example of the humanist scholar and publisher Etienne Dolet 1509-46 who was eventually executed for heterodoxy Worth traces translation's relation to the intellectual and political controversies of the time making an original and significant contribution to 16th century French studies

*The Politics of Translation in the Middle Ages and the Renaissance* Renate Blumenfeld-Kosinski, Luise von Flotow, Daniel Russell, 2001-03-07 The articles in this collection written by medievalists and Renaissance scholars are part of the recent cultural turn in translation studies which approaches translation as an activity that is powerfully affected by its socio-political context and the demands of the translating culture The links made between culture politics and translation in these texts highlight the impact of ideological and political forces on cultural transfer in early European thought While the personalities of powerful thinkers and translators such as Erasmus Etienne Dolet Montaigne and Leo Africanus play into these texts historical events and intellectual fashions are equally important moments such as the Hundred Years War whose events were partially recorded in translation by Jean Froissart the Political tussles around the issues of lay readers and rewriters of biblical texts the theological and philosophical shift from scholasticism to Renaissance relativism or European relations with the Muslim world add to the interest of these articles Throughout this volume translation is treated as a form of writing as the production of text and meaning carried out in a certain cultural and political ambiance and for identifiable though not always stated reasons No translation this collection argues is an innocent transparent rendering of the original

Court and Humour in the French Renaissance Sarah Alyn Stacey, 2009 This collection of essays by thirteen renowned specialists in the fields of French Renaissance literature and history is a fitting tribute to the scholarship of Pauline Smith Emeritus Professor in French at the University of Hull and Research Associate of the Centre for Medieval and Renaissance Studies Trinity College Dublin The essays which focus on areas of research to which Professor Smith has herself given and continues to give particular attention are organised into two frequently converging strands court and humour The contributors engage with political and cultural issues at the heart of the construction and aesthetic expression of the French Renaissance whilst also offering insights into the broader European context The collection as a whole challenges and revises a number of established views and identifies paths for future research

*Virgilian Identities in the French Renaissance* Phillip John Usher, Isabelle Fernbach, 2012 Virgil's works principally the *Bucolics* the *Georgics* and above all the *Aeneid* were frequently read translated and rewritten by authors of the French Renaissance The contributors to this volume show how readers and writers entered into a dialogue with the texts using them to grapple with such difficult questions as authorial political and communitarian identities It is demonstrated how Virgil's works are more than Ancient models to be imitated

They reveal themselves instead to be part of a vibrant moment of exchange central to the definition of literature at the time

**Women and the Book Trade in Sixteenth-Century France** Susan Broomhall, 2018-11-07 Focusing on the vastly understudied area of how women participated in the book trades not just as authors but also as patrons copyists illuminators publishers editors and readers *Women and the Book Trade in Sixteenth Century France* foregrounds contributions made by women during a period of profound transformation in the modes and understanding of publication Broomhall asks whether women's experiences as authors changed when manuscript circulation gave way to the printed book as a standard form of publication Innovatively she broadens the concept of publication to include methods of scribal publication through the circulation and presentation of manuscripts and expands notions of authorship to incorporate a wide sample group of female writers and publishing experiences She challenges the existing view that manuscript offered a safe means of semi public exposure for female authors and explores its continuing presence after the introduction of print The study introduces a wide and rich range of unexamined sources on early modern women using an extensive range of manuscripts and the entire corpus of women's printed texts in sixteenth century France Most of the original texts uncovered during the author's own extensive archival and bibliographical research have never been re published in modern French Most of the citations from them are here translated into English for the first time The work presents the only checklist of all known women's writings in printed texts from prefaces and laudatory verse to editions of prose and poetry between 1488 and 1599 *Women and the Book Trade in Sixteenth Century France* constitutes the most comprehensive assessment of women's contribution to contemporary publishing yet available Broomhall's innovative approach and her conclusions have relevance not only for book historians and French historians but for a broad range of scholars who work with other European literatures and histories as well as women's studies
