Pragmatism And Values The Central European Pragmatist Forum Volume One:

Central European Pragmatist Forum Central European Pragmatist Forum, John Ryder, 2004 **Pragmatism and Values**, 2021-12-28 The essays in this volume are from the First Conference of the Central European Pragmatist Forum held in Slovakia in 2000 Written by prominent specialists in pragmatism and American philosophy from the United States and Europe they survey contemporary thinking on classical and contemporary pragmatism social and political theory aesthetics and the application of pragmatist thought in contemporary Europe New Perspectives on Pragmatism and Analytic Philosophy. Rosa M. Calcaterra, 2011-04 The strong influence of pragmatism in the early 20th century international debate its subsequent and apparently inexorable decline and its recent revival are intertwined with the fate of other currents of thought that have marked the development of contemporary philosophy This volume clarifies the most recent events of this development focusing on key theoretical issues common both to American classic philosophical tradition and analytical thought Many essays in this volume belong to what we can call new pragmatism namely a pragmatist perspective that is different from the postmodernist neo pragmatism la Rorty The volume shows that both pragmatists and analytic thinkers stress the importance of logic and scientific method in order to deal with philosophical problems and seek for a clarification of the relation between our ethical values and our understanding of natural facts Moreover the anti skeptic attitude that characterizes pragmatism as well as most part of analytic philosophy and their common attention to the problems of language and communication are emphasized The more sophisticated tools for addressing both theoretical and methodological problems developed by analytic philosophy are pointed out and the essays show the possible integration of these two forms of speculation that for too a long time mutually disregarded one another **Pragmatism, Education, and Children**, 2008-01-01 This book presents fourteen new essays by international scholars about the intersections between pragmatism education and philosophy with children Pragmatism from its beginnings has sought a revolution in learning and is itself a special kind of philosophy of education What can the applications of pragmatism to pedagogy around the world teach us today **Spiritual and Political Dimensions of Nonviolence and Peace** David Boersema, Katy Gray Brown, 2006 This book is a collection of philosophical papers that explores theoretical and practical aspects and implications of nonviolence as a means of establishing peace The papers range from spiritual and political dimensions of nonviolence to issues of justice and values and proposals for action and change **Idealization XI** Francesco Coniglione, Roberto Poli, R. D. Rollinger, 2004 Discussions about abstraction are so important and so profound that this topic can hardly be neglected It has inevitably cropped up again in various periods of philosophical enquiry Despite these ancient roots and after the great debate that characterised the empirical and rationalistic tradition interest in the problem has unfortunately been absent in large measure from the mainstream of mathematical logic and analytic philosophy It seems that there is a gap between the epistemological theorization in which it is difficult to find new insights on the problem of abstraction and the historical

studies concerning the development of philosophical thought Such studies however present a more fertile ground for such insights Here the reader will find presented for the first time a collection of papers about the topic considered from an historical point of view together with an awareness of the need for building a bridge between historical research and theoretical speculation Accordingly the volume consists of both general overviews which sketch the significance and the fortunes of abstraction in science philosophy and logic the first part and historical case studies which focus on abstraction in particular thinkers the second part This volume is of interest for both general philosophers and historians of philosophy

Jewish Thought, Utopia, and Revolution

Elena Namli, Jayne Svenungsson, Alana M. Vincent, 2014-05-01 In response to the grim realities of the present world Jewish thought has not tended to retreat into eschatological fantasy but rather to project utopian visions precisely on to the present moment envisioning redemptions that are concrete immanent and necessarily political in nature In difficult times and through shifting historical contexts the messianic hope in the Jewish tradition has functioned as a political vision the dream of a peaceful kingdom of a country to return to or of a leader who will administer justice among the nations Against this background it is unsurprising that Jewish messianism in modern times has been transposed and lives on in secular political movements and ideologies The purpose of this book is to contribute to the deeper understanding of the relationship between Jewish thought utopia and revolution by taking a fresh look at its historical and religious roots We approach the issue from several perspectives with differences of opinion presented both in regard to what Jewish tradition is and how to regard utopia and revolution These notions are multifaceted comprising aspects such as political messianism religious renewal Zionism and different forms of Marxist and Anarchistic movements **Evolutionary Ontology** Josef Šmajs, 2008 This book examines new concept of evolutionary ontology based on the idea of radically different ontic orders natural and cultural being It explains how culture evolved out of nature and how it became anti natural The remedy is seen in the global biophilous reconstruction of culture The value of the live planet Earth and the subject capable of creative activity and evolution are given fundamental philosophical interpretation

Reality and Culture Patricia Hanna, 2014-03-15 More than being a volume about the philosophy of Bernard Harrison this volume is about how Harrison conceptualizes the creation of the human world One might be tempted to classify Harrison as a major voice in many diverse discussions philosophy of literature philosophy of language philosophy of mind color studies epistemology metaphysics moral philosophy philosophy of culture Wittgenstein antisemitism and more without recognizing a unifying strand that ties them together Nothing could be farther from the truth Harrison contests and destabilizes a persistent and misleading alignment of culture with subjectivity whether found in unexamined distinctions between nature and culture or appearance and reality His general aim has been to undermine the belief that human culture deals in smoke and mirrors and that the only realities are those of extra human nature He emphasizes the paraxial foundation of meaning and argues that the creative inventions of language and culture are as real as any extra linguistic reality While granting the existence of extra human reality he holds it to be in itself conceptually unorganised but nevertheless cognitively accessible by way of sense perception and physical manipulation This volume offers new critical essays that examine Harrison s corpus written by distinguished voices in philosophy and literary studies It bridges many of the abysses of conflicting opinion opened by the culture wars of the past half century Importantly it includes an opening essay by Harrison that elucidates the unifying strand running through his variegated philosophical writings and concludes with a chapter in which he replies to and reflects on the other critical essays herein
