## **Prague Eleven Centuries Of Architecture:**

**Prague** Jiří Štursa, Svatopluk Voděra, 1992      *Prague* Richard Burton, Richard D. E. Burton, 2003 A treasure house of Gothic baroque and modernist architecture Prague is also a city of icons and symbols statues saints and signs reveal a turbulent history of religious and cultural conflict As Kafka's nightmare city and home of the Good Soldier Svejk the Czech capital also produced two of the twentieth century's emblematic writers Richard Burton explores this metropolis of theatrical allusion in which politics and drama have always been intertwined His interpretation of the city's cultural past and present encompasses opera and rock music puppetry and cinema surrealism and socialist realism      *Prague* Jane Pavitt, 2000 The extraordinary heritage of Prague has meant that the city is now regarded as one of the artistic and cultural capitals of the world The turbulent history of the city is reflected in the range and diversity of buildings discussed in this text from its baroque churches and palaces to the state offices and housing projects of the post 1945 communist era The guide covers all aspects of Prague's development since its early years through its periods of both power and decline from the 15th to the 20th century Particular attention is paid to the architecture of the last 100 years Since the democratic revolution of 1989 the city has once again become a place of pilgrimage for those interested in architecture and design This book covers some of the most recent architectural projects to be planned in the city      Culture and Customs of the Czech Republic and Slovakia Craig Cravens, 2006-08-30 The Czech Republic is a red hot European destination and the charms of Slovakia are slowly being discovered by Westerners as well The two countries share fundamental similarities in language and culture but they never really managed to create a common national Czechoslovak identity after being merged in 1918 when the Austro-Hungarian Empire collapsed With the lifting of the Iron Curtain in 1989 through the Velvet Revolution and the final breakup of Czechoslovakia in to two countries in 1993 this up to date substantive insight is much needed This volume overviews the current social cultural and political scene of both countries so that general readers come away with a solid understanding of where the Czechs and Slovaks have been and where they are going The land people and history chapter lays the groundwork for the rest of the narrative In the chapter on religion and thought the reasons for the widespread atheism of the Czechs and the contrasting religiosity of the Slovaks are explained Both peoples are shown to have relaxed attitude toward life and a love of celebrations with a strong beer culture The state of women and family and feminism in the post Soviet era is also discussed and readers will learn about the role of romance novels and the Czech Cosmopolitan The literature chapter emphasizes the Czech sense of humor and the lack of translations of Slovakian works The crises in journalism and cinema are other important topics Finally the strong traditions of theater and music which have always been part of the Czech national consciousness are seen to be as alive and vibrant as in any place in the world      *Prague in Black and Gold* Peter Demetz, 2025-08-22 Prague is at the core of everything both wonderful and terrible in Western history but few people truly understand this city's unique culture In *Prague in Black and Gold* Peter Demetz strips away sentimentalities and distortions

and shows how Czechs Germans Italians and Jews have lived and worked together for over a thousand years **To Scale**

Eric J. Jenkins, 2008 This powerful reference features one hundred famous urban plans all drawn to the same scale each accompanied by a one page summary of the site discussing its history design and lessons for future urban design *Cultural Landscapes of Post-Socialist Cities* Mariusz Czepczynski, 2016-04-22 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people s power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urbanscapes their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urbanscapes clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights

**Building A New Heritage (RLE Tourism)** Gregory Ashworth, Peter Larkham, 2013-05-20 At the heart of the European debate lies the tension between the idea of European unity and individual state identities and nationalisms This volume provides an insight into this dichotomy by exploring the role of heritage in the new Europe The main theme of this book is that a number of possible heritages can be shaped from the European past depending on the purposes for which they are intended Through different methods of management intervention heritage can fulfil a variety of functions becoming a major commercial resource in the form of the tourism industry or enlisted in the creation and maintenance of place identities Leading contributors look at different perceptions of heritage by different cultures and the social and political consequences of heritage planning The nature of heritage planning for emerging spatially fragmented state structures is also discussed Prague Derek Sayer, 2018-10-15 Thirty years ago Prague was a closed book to most travelers Today it is Europe s fifth most visited city surpassed only by London Paris Istanbul and Rome With a stunning natural setting on the Vltava river and featuring a spectacular architectural potpourri of everything from Romanesque rotundas to gothic towers Renaissance palaces Baroque churches art nouveau caf s and cubist apartment buildings Prague may well be Europe s most beautiful capital city But behind this beauty lies a turbulent and often violent history and in this book Derek Sayer explores both Located at the uneasy center of the continent Prague has been a crossroads of cultures for more than a millennium From the religious wars of the middle ages and the nationalist struggles of the nineteenth century to the modern conflicts of fascism communism and democracy Prague s history is the history of the forces that have shaped

Europe Sayer also goes beyond the complexities of Prague's colorful past his expert very readable and exquisitely illustrated guide helps us to see what Prague is today He not only provides listings of what to see hear and do and where to eat drink and shop but also offers deep personal reflection on the sides of Prague tourists seldom see from a model interwar modernist villa colony to Europe's biggest Vietnamese market *Prague*, 2000 This guide to Prague is the perfect travel companion offering suggestions on what to see and do background on history and cultural heritage and a selection of hotels and restaurants in Prague

**German Façade Design** Randall Ott, 2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy France and Britain Scholarly discussion of broad traditions or continuities within Germanic or Central European façade design is even sparser Baroque era studies of the region mostly devote themselves to isolated architects monuments or movements Modernism's advent decisively changed this Germanic architecture enjoyed sudden ascendancy Yet even so study specifically of that region's façades still lagged nothing compares to the dozens of treatments of Le Corbusier's façade systems for example and how these juxtapose with French neoclassical or Italian Renaissance methods Given the paucity of multi period studies one can be forgiven for believing Germany's effervescence of radical modern works seems unprecedented This book takes up these multiple quandaries It identifies and documents a previously unrecognized compositional tradition characterized here as the screen façade and posits it as a counter narrative critiquing the essentialist authentic canon currently dominant in Western architectural history By crossing evenly over the dividing line between the historical and modern periods it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth century architectural developments The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria the Czech Republic German speaking Switzerland and nearby areas of Central Europe While nearly 75 buildings are mentioned and illustrated a dozen are given extensive analysis and the book focuses on the works of three architects Schinkel Behrens and Mies Relationships between examples of these three architects' façades far transcend mere homage amongst masters Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622 The book argues that in Germany northern Gothic affinities for bisection intense repetition and rote aggregation intersected with southern Classical affinities for symmetry hierarchy and centrality thereby spawning a unique hybrid product the screen Instead of graphic formality this study is guided by on site perceptions propositional contrasts means of approach interpretive conflicts and emotion and it relates the design of these façades to concepts proposed by contemporary philosophers including Novalis Hegel Nietzsche Freud Adorno and most importantly Gadamer on hermeneutics
