What the River Carries Lisa Knopp,2012-05-18 In this informed and lyrical collection of interwoven essays Lisa Knopp explores the physical and cultural geography of the Mississippi Missouri and Platte rivers she has come to understand and cherish At the same time she contemplates how people experience landscape identifying three primary roles of environmental perception the insider the outsider and the outsider seeking to become an insider Viewing the waterways through these approaches she searches for knowledge and meaning Because Knopp was born and raised just a few blocks away she considers the Mississippi from the perspective of a native resident a dweller in the land She revisits places she has

long known Nauvoo Illinois the site of two nineteenth century utopias one Mormon one Icarian Muscatine Iowa once the world's largest manufacturer of pearl mussel shell buttons and the mysterious prehistoric bird and bear shaped effigy mounds of northeastern Iowa On a downriver trip between the Twin Cities and St Louis she meditates on what can be found in Mississippi river water state lines dissolved oxygen smallmouth bass corpses family history wrecked steamboats mayfly nymphs toxic perfluorinated chemicals philosophies Knopp first encountered the Missouri as a tourist and became acquainted with it through literary and historical documents as well as stories told by longtime residents Her journey includes stops at Fort Bellefontaine where Lewis and Clark first slept on their sojourn to the Pacific Little Dixie Missouri's slaveholding hemp growing region as revealed through the life of Jesse James's mother Fort Randall Dam and Lake Francis Case the construction of which destroyed White Swan on the Yankton Sioux Reservation and places that produced unique musical responses to the river including Native American courting flutes indie rock Missouri River valley fiddling Prohibition era jazz jam sessions and German folk music Knopp's relationship with the Platte is marked by intentionality she settled nearby and chose to develop deep and lasting connections over twenty years residence On this adventure she ponders the half million sandhill cranes that pass through Nebraska each spring the ancient varieties of Pawnee corn growing at the Great Platte River Road Archway Monument a never broken tract of tallgrass prairie the sugar beet industry and the changes in the river brought about by the demands of irrigation In the final essay Knopp undertakes the science of river meanders consecutive loops of water moving in opposite directions which form around obstacles but also develop in the absence of them What initiates the turning that results in a meander remains a mystery Such is the subtle and interior process of knowing and loving a place What the River Carries asks readers to consider their own relationships with landscape and how one can most meaningfully and responsibly dwell on the earth's surface

Where We Belong Paul Shepard, 2009-04-01

Gathered here in book form for the first time the fourteen essays in Where We Belong exemplify Paul Shepard's interdisciplinary approach to human interaction with the natural world Drawn from Shepard's entire career and presented chronologically these pieces vary in setting from the Hudson River to the American prairie to New Zealand Equally impressive is Shepard's spatial range as he moves from subtle differences to grand designs from the intimacy of an artist's brush stroke to a vista of the harsh Greek terrain Alluding to a range of sources from Star Trek to Marshall McLuhan to the Bible the writings discuss such topics as the geomorphology of

New England landscape paintings beautification and conservation projects the Oregon Trail and tourism Whether Shepard is pondering why the Great Plains conjured up sea imagery in early observers or how pioneers often resorted to architectural terms temple castle bridge tower when naming the West's natural formations he exposes and thus invites us to unshoulder the cultural and historical baggage we bring to the act of seeing Throughout the book Shepard seeks the antecedents of environmental perception and questions whether the paradigm we inherited should be superseded by one that leads us to a greater concern for the health of the planet This volume is an important addition to Shepard's canon if only for the new view it offers of his intellectual development More important however these selections demonstrate Shepard's grasp of a wide range of ideas related to the physical environment including the various factors historical aesthetic and psychological that have shaped our attitudes toward the natural world and color the way we see it *The Southwest in American Literature and Art* David Warfield Teague,1997-10 By analyzing ways in which indigenous cultures described the American Southwest David Teague persuasively argues against the destructive approach that Americans currently take to the region Included are Native American legends and Spanish and Hispanic literature As he traces ideas about the desert Teague shows how literature and art represent the Southwest as a place to be sustained rather than transformed 14 illustrations **Prairie Fever: British Aristocrats in the American West 1830-1890** Peter Pagnamenta,2012-06-18 A deeply researched and finely delivered look at what can best be described as a counterintuitive slice of American history Washington Post From the 1830s onward a succession of well born Britons headed west to the great American wilderness to find adventure and fulfillment They brought their dogs sporting guns valets and all the attitudes and prejudices of their class *Prairie Fever* explores why the West had such a strong romantic appeal for them at a time when their inherited wealth and passion for sport had no American equivalent In fascinating and often comic detail the author shows how the British behaved and what the fur traders hunting guides and ordinary Americans made of them as they crossed the country to see the Indians hunt buffalo and eventually build cattle empires and buy up vast tracts of the West But as British blue bloods became American landowners they found themselves attacked and reviled as land vultures and accused of attempting a new colonization In a final denouement Congress moved against the foreigners and passed a law to stop them from buying land **The Prairie World** David Francis Costello,1980 Reveals the grassland's history climate landscape ever changing moods and survival battles waged by plant and animal inhabitants **Macmillan's Magazine** ,1862 Western Field ,1908 **The Ladies' Repository** ,1868 MacMillan's Magazine Sir George Grove,David Masson,John Morley,Mowbray Morris,1862
