Prairie Wool Stone Diggers Historical Society,1980      **Settling the Canadian-American West, 1890-1915** John William Bennett,1995-01-01 This anthropological history tells the story of homesteading and community organization in the Canadian American West through personal reminiscences and locally written histories John W Bennett and Seena B Kohl interpret those stories through the lenses of history and social science and they present a view of settlement experience as one phase of the evolving postfrontier society and culture of western North America *Settling the Canadian American West 1890 1915* contains a synthesis of Canadian and U S settlement experiences giving to the extent possible equal space to both sides of the international boundary The experiences of people in these adjacent territories were virtually identical with emigrant populations from the same countries and socioeconomic strata Among other aspects of the homesteading experience the authors explore the interactive adaptation that developed in the West Networks of mutual aid reverently remembered by the voices found in these pages eased the inevitable hardships      **Imperial Plots** Sarah Carter,2016-10-07 Sarah Carter s *Imperial Plots Women Land and the Spadework of British Colonialism on the Canadian Prairies* examines the goals aspirations and challenges met by women who sought land of their own Supporters of British women homesteaders argued they would contribute to the spade work of the Empire through their imperial plots replacing foreign settlers and relieving Britain of its surplus women Yet far into the twentieth century there was persistent opposition to the idea that women could or should farm British women were to be exemplars of an idealized white femininity not toiling in the fields In Canada heated debates about women farmers touched on issues of ethnicity race gender class and nation Despite legal and cultural obstacles and discrimination British women did acquire land as homesteaders farmers ranchers and speculators on the Canadian prairies They participated in the project of dispossessing Indigenous people Their complicity was however ambiguous and restricted because they were excluded from the power and privileges of their male counterparts *Imperial Plots* depicts the female farmers and ranchers of the prairies from the Indigenous women agriculturalists of the Plains to the array of women who resolved to work on the land in the first decades of the twentieth century      **Saskatchewan History** ,2013      *Flax Americana* Joshua MacFadyen,2018-10-10 Farmers feed cities but starting in the nineteenth century they painted them too *Flax from Canada and the northern United States* produced fibre for textiles and linseed oil for paint critical commodities in a century when wars were fought over fibre and when increased urbanization demanded expanded paint markets *Flax Americana* re examines the changing relationships between farmers urban consumers and the land through a narrative of Canada s first and most important industrial crop Initially a specialty crop grown by Mennonites and other communities on contracts for small town mill complexes flax became big business in the late nineteenth century as multinational linseed oil companies quickly displaced rural mills Flax cultivation spread across the northern plains and prairies particularly along the edges of dryland settlement and then into similar ecosystems in South America s Pampas

Joshua MacFadyen's detailed examination of archival records reveals the complexity of a global commodity and its impact on the eastern Great Lakes and northern Great Plains. He demonstrates how international networks of scientists, businesses, and regulators attempted to predict and control the crop's frontier geography, how evolving consumer concerns about product quality and safety shaped the market and its regulations, and how the nature of each region encouraged some forms of business and limited others. The northern flax industry emerged because of border crossing communities. By following the plant across countries and over time, *Flax Americana* sheds new light on the ways that commodities, frontiers, and industrial capitalism shaped the modern world.

**Farming across Borders** Timothy P. Bowman, Kristin Hoganson, Laura Hooton, Josh MacFadyen, Todd Meyers, Peter S. Morris, Andrew Dunlop, Alicia Marion Dewey, John Weber, Sonia Hernández, Rosa E. Cobos, Matt Caire-Pérez, Paige Raibmon, Jason McCollom, Thomas D. Isern, Suzanne Kelley, Anthony Carlson, Stephen Mumme, Tisa Anders, 2017-12-01. *Farming across Borders* uses agricultural history to connect the regional experiences of the American West, northern Mexico, western Canada, and the North American side of the Pacific Rim now writ large into a broad history of the North American West. Case studies of commodity production and distribution, trans-border agricultural labor, and environmental change unite to reveal new perspectives on a historiography traditionally limited to a regional approach. Sterling Evans has curated nineteen essays to explore the contours of big agricultural history. Crops and commodities discussed include wheat, cattle, citrus, pecans, chiles, tomatoes, sugar beets, hops, henequen, and more. Toiling over such crops of course were the people of the North American West, and as such the contributing authors investigate the role of agricultural labor from braceros and Hutterites to women working in the sorghum fields and countless other groups in between. As Evans concludes, society as a whole, no matter in what country, often ignores the role of agriculture in the past and the present. *Farming across Borders* takes an important step toward cultivating awareness and understanding of the agricultural economic and environmental connections that loom over the North American West regardless of lines on a map. In the words of one essay, we are tied together in a hundred different ways.
