Kelly, 2013-04-15 Challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity *Managing the Return of the Wild* Michaela Fenske, Bernhard Tschöfen, 2020-07-08 This book explores attitudes and strategies towards the return of the wild in times of ecological crisis focusing on wolves in Europe The contributions from a variety of disciplines discuss human encounters with wolves engaging with traditional narratives and contemporary conflicts Covering a range of geographical areas the case studies featured demonstrate the tremendous impact of the return of the wolf in European societies Wolves are a keystone species that exemplify humanity's relation to what is called nature and their return generates powerful debates about what nature actually is and how much it is needed or should be permitted to exist The book considers the return of the wild as a catalyst for fundamental socio biological changes of the world within human societies and the various responses of humans to wolves demonstrate both our potential and limitations when it comes to multispecies communities and negotiating societal change *Managing the Return of the Wild* will be relevant to a broad audience interested in discussions of social and ecological conflict today including scholars from multispecies studies and diverse disciplines such as biology forestry management and folklore studies **Adaptive Responses of Native Amazonians** Raymond B. Hames, 2014-06-28 Adaptive Responses of Native Amazonians **The Ethics of Anthropology and Amerindian Research** Richard J. Chacon, Rubén G. Mendoza, 2011-12-15 The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and or violence is one that weighs heavily on anthropologists This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities This work documents the various ethical dilemmas that confront anthropologists

and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves
