Environmental Decisions National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Research Opportunities and Priorities for EPA, 1997-08-01 Over the past decades environmental problems have attracted enormous attention and public concern Many actions have been taken by the U S Environmental Protection Agency and others to protect human health and ecosystems from particular threats Despite some successes many problems remain unsolved and new ones are emerging Increasing population and related pressures combined with a realization of the interconnectedness and complexity of environmental systems present new challenges to policymakers and regulators Scientific research has played and will continue to play an essential part in solving environmental problems Decisions based on incorrect or incomplete understanding of environmental systems will not achieve the greatest reduction of risk at the lowest cost This volume describes a framework for acquiring the knowledge needed both to solve current recognized problems and to be prepared for the kinds of problems likely to emerge in the future Many case examples are included to illustrate why some environmental control strategies have succeeded where others have fallen short and how we can do better in the future **Design and Analysis of Long-term Ecological Monitoring Studies** Robert A.

Gitzen,2012-06-07 Comprehensive and multidisciplinary coverage of fundamental and advanced statistical tools and issues relevant to long term ecological monitoring **General Technical Report PNW-GTR ,1998 **Ecological Modeling for Resource Management**** Virginia H. Dale,2006-04-18 This book will serve as a readable introduction to ecological modeling for people involved in resource management and will also review models for specific applications of interest to more experienced modelers Successful uses of ecological models as well as discussions of important issues in modeling are addressed The authors of this volume hope to close the gap between the state of the art in ecological modeling and the state of the practice in the use of models in management decision making **Monitoring Ecosystems** David E. Busch, Often a commitment to large ecosystem initiatives is linked both conceptually and legally with requirements for ecological monitoring as a means of evaluating the effectiveness of management actions Programs to determine ecosystem status and trends can contribute significantly to the resolution of difficult and contentious management questions and can play a key role both in sharpening the focus of research questions and in developing adaptive approaches to resource management Monitoring Ecosystems brings together leading scientists and researchers to offer a groundbreaking synthesis of lessons learned about ecological monitoring in major ecoregional initiatives around the United States Contributors Donald L DeAngelis Lance H Gunderson Barry R Noon John C Ogden Craig J Palmer Keith M Reynolds Paul L Ringold John R Sauer Lawrence E Stevens and many others present insights and experiences gained from their work in designing developing and implementing comprehensive ecosystem monitoring programs in the Pacific Northwest the lower Colorado River Basin and the Florida Everglades The book outlines the conceptual and scientific underpinnings for regional scale ecosystem monitoring examines the role and importance of data management modeling and integrative analyses considers techniques for and experience with monitoring habitats populations and communities Chapters by the editors synthesize and expand on points made throughout the volume and present recommendations for establishing frameworks for monitoring across scales from local to international Monitoring Ecosystems presents a critical examination of the lessons learned from direct experience along with generalized conclusions that can be applied to monitoring programs in the United States and around the world It is a vital contribution to science based monitoring efforts that will allow those responsible for developing and implementing ecoregional initiatives to make use of knowledge gained in previous efforts enabling them to focus their energies on system specific questions and problems Strengthening Science at the U.S. Environmental Protection Agency--National Research Council (NRC) Findings United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment,2001 **Our Common Journey** National Research Council,Policy and Global Affairs,Policy Division,Board on Sustainable Development,1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is

nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability The book also identifies the greatest threats to sustainability in areas such as human settlements agriculture industry and energy and explores the most promising opportunities for circumventing or mitigating these threats It goes on to discuss what indicators of change from children s birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability
