Pedagogy Fred R. Eckman, Jean Mileham, Rita Rutkowski Weber, Diane Highland, Peter W. Lee, 2013-10-08 A volume on second language acquisition theory and pedagogy is at the same time a mark of progress and a bit of an anomaly The progress is shown by the fact that the two disciplines have established themselves as areas of study not only distinct from each other but also different from linguistic theory This was not always the case at least not in the United States The anomaly results from the fact that this book deals with the relationship between L2 theory and pedagogy despite the conclusion that

there is currently no widely accepted theory of SLA Grouped into five sections the papers in this volume consider questions about L2 theory and pedagogy at the macro level from the standpoint of the L2 setting consider input in terms of factors which are internal to the learner examine the question of external factors affecting the input such as the issue of whether points of grammar can be explicitly taught deal with questions of certain complex linguistic behaviors and the various external and social variables that influence learners and discuss issues surrounding the teaching of pronunciation factors that affect a non native accent

A Philosophy of Second Language Acquisition Marysia Johnson, 2008-10-01

How does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners' mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner's mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky's sociocultural theory and Bakhtin's literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson's model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance

Language Teaching and Skill Learning Keith Johnson, 1996-01-09 This book argues controversially that second language acquisition has much in common with other forms of skill learning and that there is much to be learned about the business of language teaching by considering the views and practices of teachers in other domains For many Applied Linguists language is unique among human skills incomparable in its acquisition and use to other forms of behaviour Their study of second language learning and teaching may thus draw on knowledge about first language acquisition but not on what is known about the learning of non linguistic skills This book argues against such an approach It begins by considering arguments for and against the

uniqueness of language It reviews the recent literature in second language acquisition looking both at general learning theories which account for language alongside other skills and opposing theories mostly based on the study of Universal Grammar The book then turns to language teaching and in a programmatic way considers what insights may be gained by viewing language within a general skills framework Particular attention is given to how the teacher may help students to make consciously learned language automatic
