Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 11 is a collection of papers that discusses world systems theory modeling interregional interaction in prehistory and the archaeological analysis of ceramics Some papers review dating and weathering of inorganic materials strategies for paleo environmental reconstruction as well as deposits and depositional events One paper reviews the Old World state formation that occurred in West Asia during the fourth and third millennia B C Another paper examines the role

of interactions among societies in the process of local social change and the need for archaeologists to develop a framework in which to analyze intersocietal interaction processes The presence of items such as ceramics is associated directly to factors of availability functions economic values or ethnic affiliation As an example one paper cites the use and misuse of English and American ceramics in archaeological analysis in identifying cultural patterns and human behavior Another paper notes that each biological or mechanical agent of transport and deposition has its own respective attributes on a deposit where the attributes of sedimentary particles on the deposit can be defined From such definitions the archaeologists can make observations and inferences Sociologists anthropologist ethnographers museum curators professional or amateur archaeologists and academicians studying historical antiquities will find the collection very useful David H. Brown, 2021-10-24 Ever since its emergence in colonial era Cuba Afro Cuban Santer a or Lucum has displayed a complex dynamic of continuity and change in its institutions rituals and iconography Originally published in 2003 Santer a Enthroned combines art history cultural anthropology and ethnohistory to show how Africans and their descendants have developed novel forms of religious practice in the face of relentless oppression Focusing on the royal throne as a potent metaphor in Santer a belief and practice it shows how negotiations among ideologically competing interests have shaped the religion s symbols rituals and institutions from the nineteenth century to the present Rich case studies of change in Cuba and the United States including a New Jersey temple and South Carolina's Oyotunji Village reveal patterns of innovation similar to those found among rival Yoruba kingdoms in Nigeria Throughout the book argues for a theoretical perspective on culture as a field of potential strategies and usuable pasts that actors draw upon to craft new forms and identities a perspective that will be invaluable to all students of the African Diaspora A Refuge of Cure or Care Madeline Kearin Ryan, 2021-05-18 In A Refuge of Cure or Care The Sensory Dimensions of Confinement at the Worcester State Hospital for the Insane Madeline Kearin Ryan analyzes the therapy model

of the nineteenth century asylum Because the five senses were believed to provide a direct conduit into a person s mental condition the curative force of the hospital was thought to reside in its command over sensory experience Ryan examines how the institution was designed to target each of the five senses as a mode of therapy and conversely how that well intentioned design materialized in the haphazard realm of institutional practice In doing so Ryan seeks to reconcile the disjuncture between the benevolent promise of the asylum model and its ultimate failure in a way that captures the complex power dynamics and heterogeneity of actors within the institution Lines that Divide James A. Delle, Stephen A. Mrozowski, Robert Paynter, 2000 The division of human society by race class and gender has been addressed by scholars in many of the social sciences Now historical archaeologists are demonstrating how material culture can be used to examine the processes that have erected boundaries between people Drawing on case studies from around the world the essays in this volume highlight diverse moments in the rise of capitalist civilization both in Western Europe and its colonies In the first section the contributors address the dynamics of the racial system that emerged from European colonialism They show how archaeological remains shed light on the institution of slavery in the American Southeast on the treatment of Native Americans by Mormon settlers and on the color line in colonial southern Africa The next group of articles considers how gender was negotiated in nineteenth century New York City in colonial Ecuador and on Jamaican coffee plantations A final section focuses on the issue of class division by examining the built environment of eighteenth century Catalonia and material remains and housing from early industrial Massachusetts These essays constitute an archaeology of capitalism and clearly demonstrate the importance of history in shaping cultural consciousness Arguing that material culture is itself an active agent in the negotiation of social difference they reveal the ways in which historical archaeologists can contribute to both the definition and dismantling of the lines that divide The Official Price Guide to Antiques and Collectibles, 1993 David P.
