Responding to Crisis Dan Pyle Millar,Robert L. Heath,2003-12-08 In recent years researchers and practitioners have explored the nature theory and best practices that are required for effective and ethical crisis preparation and response The consequences of being unprepared to respond quickly appropriately and ethically to a crisis are dramatic and well documented For this reason crisis consulting and the development of crisis response plans and protocols have become more than a cottage industry Taking a rhetorical view of crisis events and utterances this book is devoted to adding new insights to the discussion and to describing a rhetorical

approach to crisis communication To help set the tone for that description the opening chapter reviews a rhetorical perspective on organizational crisis As such it raises questions and provokes issues more than it addresses and answers them definitively The other chapters can be viewed as a series of experts participating in a panel discussion The challenge to each of the authors is to add depth and breadth of understanding to the analysis of the rhetorical implications of a crisis as well as to the strategies that can be used ethically and responsibly Central to this analysis is the theoretic perspective that crisis response requires rhetorically tailored statements that satisfactorily address the narratives surrounding the crisis which are used by interested parties to define and judge it This volume will be of value to scholars and students interested in crisis communication and is certain to influence future work and research on responding to crises Healthcare Community Synergism between Patients, Practitioners, and Researchers Bryan, Valerie C., Bird, Jennifer Lynne, 2016-07-13 Proper health education is a vital component to ensuring patients satisfaction safety and well being To achieve this goal interdisciplinary collaboration has emerged as an innovative method for promoting healthy living Healthcare Community Synergism between Patients Practitioners and Researchers is an authoritative reference source for the latest scholarly research on the various collaborative efforts to improve the current state of health systems and patient education Highlighting research methodologies aimed to enrich the quality of available information in healthcare environments this book is ideally designed for medical professionals educators and researchers **Investing from the Heart** Jack A.
