Social Theory in Contemporary Asia Ann Brooks,2010-07-14 Philosophical debates around reflexivity identity and intimacy have preoccupied Western social and cultural theorists since the 1990s and this book examines them in relation to the Chinese diasporic cultures in Asia The debates are set within the context of globalization and its impact on cultural gendered and ethnic identities in late modernity Polygamy and Law in Contemporary Saudi Arabia Maha Yamani,2022-07-01 The topic of polygamy in Islamic countries is generally perceived by outsiders as something linked to harems and Hollywood style foreign intrigues The practice is frequently viewed through sexual connotations and male power versus female powerlessness The purpose of this book is to shed light on the often misunderstood polygamous situation in modern Saudi Arabia Through a unique series of local interviews with both men and women involved in polygamy both maritally and professionally the author invites the reader into the homes and personal lives of the people directly affected

The result is a moving candid examination of the frame of mind impulses incentives reasons and circumstances that drive individuals towards polygamy as well as the social legal economic and emotional consequences that inevitably follow The book also examines the historical origins of Islamic polygamy in Mecca and Medina as well as the legal situation in Saudi Arabia today The author argues that a combination of gender differences created through local laws and public policy decisions the revival of customary tribal practices and the pressures created by the sudden materialism of modern life have all led towards a misapplication of the original Islamic legal essence of the practice and a re adaptation of the laws regulating Studies In Family Planning: India, 2003-06 As a programme of directed social and behavioural change Family Planning has made considerable progress in India An impressive library of family planning research has also been created in the process There is however a disturbing communication gap between the research and the policy maker planner administrator Research findings do not get canalized into action programmes These two remain discrete activities with very little of interface between them One of the reasons for this is lack of systematization of research findings A stage has been reached when the stock taking of the existing body of research has become necessary to provide a sort of system or order to the widely scattered data and findings and to identify research gaps This double exercise will render current research utilizable and will stimulate further research This is what Professor Kamala Gopal Rao does in this book A distinguished researcher in the field of family planning Dr Rao has attempted to summarize and present in common format over 500 studies conducted in India between 1950 1973 on different aspects of family planning The main findings of the studies are critically reviewed for their relevance to the ongoing family planning programme She has also reviewed the methodologies employed in family planning research She suggests strategies to promote utilization of research The book fulfils the much felt need for a ready reference for researchers and a guide to administrators policy makers and programme planners concerned with family planning
