Among the programming languages covered are Modula Oberon Ada95 Eiffel Salher Java and others. The issues addressed include compiler technology persistence data structures typing distribution active objects real time programming inheritance reflection languages etc      *An Introduction to Computer Science Using C* Roger Eggen, Maurice Eggen, 1993 This text is intended for an introductory course in computer science. The authors present a conceptual introduction to key concepts and methodologies of computer science. C is the language of instruction and is integrated only as needed to highlight points and demonstrate concepts throughout the text. Important features of this book include an abstract data type ADT approach and informally analyzed implementations using the Big Oh notation. There is a strong emphasis on program readability a point which is made in the first chapter and reinforced by example throughout. Recursion is also stressed and a chapter is devoted to its explanation.
