Daniel Corkery's classic book *The Hidden Ireland* is a study of Irish language poetry and culture in eighteenth century Munster The *Hidden Ireland* of the title is literary Ireland Corkery's famous book is an attempt to reclaim Munster's Irish language poets from the hands of grammarians who read them only for their preposition and participle use and to restore them to their rightful place as vibrant and vital lyricists and visionaries *The Hidden Ireland* an instant classic when first published in 1924 was listed as one of the top 50 most influential Irish books in *The Books That Define Ireland* by Tom Garvin and Bryan Fanning *The Hidden Ireland* was revolutionary in its recognition of the contribution of Irish language poets to Irish culture a contribution that had previously been minimised or even erased in the Anglo Irish versions of history that preceded it Corkery's groundbreaking study of Irish poetry and culture in eighteenth century Munster is widely acknowledged as having had a profound influence on the shaping of modern Anglo Irish literature in its foregrounding of the role of the Irish language in literature as a repository of Irishness and a specifically Irish worldview Daniel Corkery's *The Hidden Ireland* 1924 arguing for an Irish cultural revival based on the Gaelic tradition of Munster in the eighteenth century became almost official dogma after 1924 and led to impassioned debate among Irish writers and academics for decades afterwards including Sean O Faolain and Frank O Connor Corkery's rebellious students Tom Garvin and Bryan Fanning *The Books That Define Ireland* 2014

Images and Identity in Fifteenth-century Florence Patricia Lee Rubin, 2007-01-01

An exploration of ways of looking in Renaissance Florence where works of art were part of a complex process of social exchange Renaissance Florence of endless fascination for the beauty of its art and architecture is no less intriguing for its dynamic political economic and social life In this book Patricia Lee Rubin crosses the boundaries of all these areas to arrive at an original and comprehensive view of the place of images in Florentine society The author asks an array of questions Why were

works of art made Who were the artists who made them and who commissioned them How did they look and how were they looked at She demonstrates that the answers to such questions illuminate the contexts in which works of art were created and how they were valued and viewed Rubin seeks out the meeting places of meaning in churches in palaces in piazzas places of exchange where identities were taken on and transformed often with the mediation of images She concentrates on questions of vision and visuality on seeing and being seen With a blend of exceptional illustrations close analyses of sacred and secular paintings by artists including Fra Angelico Fra Filippo Lippi Filippino Lippi and Botticelli and wide ranging bibliographic essays the book shines new light on fifteenth century Florence a special place that made beauty one of its defining features

Steele,2012-02-17 The discovery of a gradual acceleration in the moon's mean motion by Edmond Halley in the last decade of the seventeenth century led to a revival of interest in reports of astronomical observations from antiquity These observations provided the only means to study the moon's secular acceleration as this newly discovered acceleration became known This book contains the first detailed study of the use of ancient and medieval astronomical observations in order to investigate the moon's secular acceleration from its discovery by Halley to the establishment of the magnitude of the acceleration by Richard Dunthorne Tobias Mayer and Jérôme Lalande in the 1740s and 1750s Making extensive use of previously unstudied manuscripts this work shows how different astronomers used the same small body of preserved ancient observations in different ways in their work on the secular acceleration In addition this work looks at the wider context of the study of the moon's secular acceleration including its use in debates of biblical chronology whether the heavens were made up of ether and the use of astronomy in determining geographical longitude It also discusses wider issues of the perceptions and knowledge of ancient and medieval astronomy in the early modern period This book will be of interest to historians of astronomy astronomers and historians of the ancient world **Art in England** Sara N.
