Second Opinion An Introduction To Health Sociology

Esther Chang, John Daly

Second Opinion An Introduction To Health Sociology:

Second Opinion John Germov, 2009-07-02 *Second Opinion* is the leading health sociology textbook for undergraduate students. Accompanied by a comprehensive online resource centre, this strong teaching text introduces students to the theories, concepts, and contexts that are needed to understand the issues confronting health sociology. [Second Opinion](#)

Jennie Mary Hornosty, John Germov, 2016-07-18 Taking an intersectional approach to the study of health and illness, *Second Opinion* introduces students to the field through an accessible yet authoritative overview of key theories, debates, and research findings. Written in a clear, straightforward style with contributions from both Canadian and international scholars, this comprehensive volume examines a wide range of topics including racialization, disability, aging, the environment, Aboriginal health, and the political economy of the health industry. Themes such as the social determinants of health, health inequalities, intersectionality, and the roles of both structure and agency in creating and maintaining the status quo are integrated throughout. The array of pedagogical features fosters engagement with the material while providing study support and suggestions for further learning. New content and examples on maternal mortality rates, the latest in sociological theory, health care inequalities in Canada, obesity, appearance norms, healthy aging, physician-assisted death, drug costs in Canada, and the world, and integrated health care encourage students to think critically about health care practices and policies in Canada within a global health perspective. Thoroughly revised and up to date with a new visual program to appeal to visual learners and a new chart on the inside cover that details the coverage of social determinants throughout the text, the second Canadian edition of *Second Opinion* ensures that students of health sociology have everything they need to understand this complex discipline right at their fingertips. Jennie Mary Hornosty, Professor of Sociology and Pro Vice-Chancellor of the Faculty of Education and Arts, John Germov, 2011-09-30 This thoroughly adapted Canadian edition introduces students to the sociology of health and illness through an accessible yet authoritative overview of the field's key debates, theories, and research findings. Written in a clear, straightforward style with contributions from both Canadian and international scholars, this comprehensive volume examines a wide range of topics including citizenship, disability, aging, indigenous health, and political economy. Themes such as the social determinants of health, health inequalities, and the roles of both structure and agency in creating and maintaining societal arrangements are integrated throughout, along with a wealth of Canadian examples, research, and statistics. Focusing on wellness as opposed to illness and complete with an array of pedagogical features to encourage students to think critically about the material, *Second Opinion* offers an engaging alternative view of the study of health. *Sociology in Today's World* Brian Furze, Cengage Learning Australia, Pauline Savy, 2014 *Sociology in Today's World* explores why sociology is important and relevant to everyday life. It teaches students how to think sociologically, not just what to think, and shows how sociology can help us make sense of our lives. It comprehensively covers key aspects and current issues in Australian and New Zealand society whilst emphasising the

importance of diversity and a global perspective *The Blackwell Companion to Medical Sociology* William C. There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or paraprofessional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents

Complementary Medicine in Australia and New Zealand Hans Baer, 2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy

chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States Lifestyle in Medicine Emily Hansen, Gary Easthope, 2007-01-24 Topical Issue given increasing individual responsibility in healthcare eg in the UK Patient s contracts Looks at professional and lay perspectives on health and illness Evidence based analysis using original research
