and literature are mutually informing and mutually sustaining. It does not cast the literary and the scientific as distinct but rather as productively in distinct cultural practices. For the two dozen new essays collected here, the presiding concern is no longer to ask how literary writers react to scientific writers but rather to study how literary and scientific practices are imbricated. These specially commissioned essays from top scholars in the area range across vast territories and produce seemingly unlikely unions between physics and rhetoric, math and Milton, Boyle and the Bible, plague and plays among many others. In these essays, so-called scientific writing turns out to traffic in metaphor, wit, imagination, and playfulness, normally associated with literature, provides material forms and rhetorical strategies for thinking physics, mathematics, archeology, and medicine.

More Fun With Pup! Activity Book Rose, J.R., 1998      Integers, Fractions, and Arithmetic Judith D. Sally, Paul J. Sally (Jr.), 2012. A co-publication of the AMS and the Mathematical Sciences Research Institute. This book, which consists of twelve interactive seminars, is a comprehensive and careful study of the fundamental topics of K-8 arithmetic. The guide aims to help teachers understand the mathematical foundations of number theory in order to strengthen and enrich their mathematics classes. Five seminars are dedicated to fractions and decimals because of their importance in the classroom curriculum. The standard topics are covered in detail but are arranged in an order that is slightly different from the usual one. Multiplication is treated first, and with that in hand, common denominators and equivalent fractions are more readily understood and are available for use when discussing addition. The book is intended for the professional development of teachers. It is appropriate for teacher education programs as well as for enrichment programs such as Mathematical Circles for Teachers. There are numerous activities in each seminar that teachers can bring into their classrooms. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents, and teachers, and the mathematics profession.
