*Elementary Students Practicing Mindfulness* Alice McIntyre,2019-03-18 Much of the literature about stress and its effects on children is focused on how these various groups can learn how to cope adapt and or manage stress Practicing mindfulness on the other hand is about becoming familiar with how one responds to stress and as important how one can differentiate between stressors that generate beneficial actions and ones that escalate distress and discomfort It was the latter approach that characterized the year long mindfulness project that a group of racial ethnic and culturally diverse fifth graders in a local Boston public school participated in during the AY2016 2017 The facilitator of the project met with participating students for an average of 75 minutes once per week In large and small group discussions and numerous creative techniques and processes e g photography symbolic art the participants explored documented and assessed how they experienced various forms of mindfulness and how those processes informed their thinking emotions and actions As important participating in the project provided the young people with opportunities to become mindfulness ambassadors who brought mindfulness into their families school and respective communities Engaging in mindfulness practices provided the young people with opportunities to develop life long skillful ways to become familiar with their minds increase their self awareness more effectively respond to difficult thoughts and emotions and provide strategies to foster positive connections with others In addition sharing and exploring strategies for developing a mindful perspective contributed to creating an environment for learning that intersected with young people s capacity to be critical thinkers and thoughtful decision makers The greatest contribution of the book is that it is threaded

with the voices of young girls and boys who speak about themselves their thoughts and emotions their experiences with fear anxiety success and failure with directness honesty and a confidence in their skills and abilities Their participation in the project demonstrates the possibilities classroom teachers have to integrate mindfulness practices into the school day As important teachers are invited to hone their own mindfulness practices to ensure that they are intentionally working with their own thoughts emotions and assumptions as they relate to the students they teach

**Photography and Collaboration** Daniel Palmer, 2020-09-14 Photography and Collaboration offers a fresh perspective on existing debates in art photography and on the act of photography in general Unlike conventional accounts that celebrate individual photographers and their personal visions this book investigates the idea that authorship in photography is often more complex and multiple than we imagine involving not only various forms of partnership between photographers but also an astonishing array of relationships with photographed subjects and viewers Thematic chapters explore the increasing prevalence of collaborative approaches to photography among a broad range of international artists from conceptual practices in the 1960s to the most recent digital manifestations Positioning contemporary work in a broader historical and theoretical context the book reveals that collaboration is an overlooked but essential dimension of the medium's development and potential

*Young Children and Families in the Information Age* Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood

education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions

**Civil Imagination** Ariella Aïsha

Azoulay, 2024-03-19 This remarkable book enhances Ariella Azoulay's position as the most compelling theorist of photography writing today Jonathan Crary author of *Scorched Earth* A groundbreaking work on the power of photography as a vehicle for civil protest Understanding photography is more than a matter of assessing photographs writes Ariella Azoulay The photograph is merely one event in a sequence that constitutes photography and which always involves an actual or potential spectator in the relationship between the photographer and the individual portrayed The shift in focus from product to practice outlined in *Civil Imagination* brings to light the way images can both reinforce and resist the oppressive reality foisted upon the people depicted Through photography *Civil Imagination* seeks out relations of partnership solidarity and sharing that come into being at the expense of sovereign powers that threaten to destroy them Azoulay argues that the civil must be distinguished from the political as the interest that citizens have in themselves in others in their shared forms of coexistence as well as in the world they create and transform Azoulay's book sketches out a new horizon of civil living for citizens as well as subjects denied citizenship inevitable partners in a reality they are invited to imagine anew and to reconstruct Beautifully produced with many illustrations *Civil Imagination* is a provocative argument for photography as a civic practice capable of reclaiming civil power
