**Masculinity and the British Organization Man since 1945** Michael Roper, 1994-01-20 The post war period is often regarded as a time when Britain underwent its managerial revolution the family firm and the gentleman amateur giving way to the large bureaucracy and the trained management expert Yet the conception of modern management as an objective process could hardly be further from the truth Drawing on detailed life history interviews with the post war generation of organization men this study explores the intimacies that operate among men in management It argues that despite the rise of professional management relations between managers continue to function in highly subjective ways The pleasure of technical innovation or of seeing a new product through to the market the mixture of rivalry and patronage that surrounds management succession the hard bargaining of industrial relations at every level managerial functions involve the dramatization of emotions among men By challenging the enduring myth of the rational organization man this book sheds new light on gender segregation in management It argues that the exclusion of women from senior positions cannot be understood simply as the outcome of unprofessional practices A focus on the emotional relations between male managers reveals the psychic dimensions of exclusionary behaviour An emotional economy flourishes among men in management but its workings have been hidden by the myth of the rational organization man

*Gender, Interaction, and Inequality* Cecilia L. Ridgeway, 2013-03-09 Causal explanations are essential for theory building In focusing on causal mechanisms rather than descriptive effects the goal of this volume is to increase our theoretical understanding of the way gender operates in interaction Theoretical analyses of gender's effects in interaction in turn are necessary to understand how such effects might be implicated with individual level and social structural level processes in the larger system of gender inequality Despite other differences the contributors to this book all take what might be loosely called a microstructural approach to gender and interaction All agree that individuals come to interaction with certain common socially created beliefs cultural meanings experiences and social rules These include stereotypes about gendered activities and skills beliefs about the status value of gender rules for interacting in

certain settings and so on. However, as individuals apply these beliefs and rules to the specific contingent events of interaction, they combine and reshape their implications in distinctive ways that are particular to the encounter. As a result, individuals actively construct their social relations in the encounter through their interaction. The patterns of relations that develop are not completely determined or scripted in advance by the beliefs and rules of the larger society. Consequently, there is a reciprocal causal relationship between constructed patterns of interaction and larger social structural forms. The constructed patterns of social relations among a set of interactants can be thought of as micro-level social structures or more simply microstructures.

#### **Foucault and Family Relations** Malcolm Voyce, 2019-05-14

*Governing from a Distance in Australia* analyzes how notions of property ownership were instrumental in maintaining family stability and continuity in rural Australia, outlining how inheritance and divorce laws functioned to govern the internal relationships of families to assist the state to rule from a distance. Using a selection of Foucault's ideas on the family, sexuality, race, space, and economics, this book shows how property operated as a disciplinary device which was underpinned by technical ideas such as surveying and cartography. This book uses legal judgments as a form of ethnography to show how property as a socio-technical device allowed a degree of local freedom for owners. This aspect of property allowed the state to stimulate ideas of local freedom to assist in ruling from a distance, demonstrating how the rural family as a domestic unit became a key field of intervention for the state as the family represented a bridge to larger relationships of power.

*Gender*

Raewyn Connell, Rebecca Pearse, 2014-12-10. How can we understand gender in the contemporary world? What psychological differences now exist between women and men? How are masculinities and femininities made? And what is the relationship between gender issues and globalizing concerns such as environmental change and economic restructuring? Raewyn Connell, one of the world's leading scholars in the field, is here joined by Rebecca Pearse as they answer these questions and more. Their book provides a readable introduction to modern gender studies, covering empirical research from all parts of the world in addition to theory and politics. As well as introducing the field, *Gender* provides a powerful contemporary framework for gender analysis with a strong and distinctive global awareness. Highlighting the multi-dimensional character of gender relations, the authors show how to link personal life with large-scale organizational structures and how gender politics changes its form in changing situations. The third edition of this influential and accessible book includes a whole new chapter on ecofeminism, environmental justice, and sustainability. It also brings the review of research up to date throughout and explains new debates and emerging gender theories. *Gender* is engaged scholarship that moves from personal experience to global problems and offers a unique perspective on gender issues today.
