Secret Scrolls Robert M. Price, 2010-12-27 Secret Scrolls is the very first examination of some forty novels in which someone discovers a new gospel Sometimes it turns out to be a hoax will it be debunked before it can work its mischief If it proves genuine will it be brought to light Or will corrupt church officials manage to prevent it The book evaluates what each author has to say about historical Jesus scholarship or New Testament research in general Sometimes the authors have done their homework other times they haven t bothered and they wind up dishing up crazy rewrites of history and outlandish theories These novels deal with abiding issues of faith even without some new discovery As soon as one engages in biblical apologetics one has stepped onto the marshy ground of probabilistic arguments an entirely different epistemology that automatically replaces simple faith And so one comes to hold one s religious convictions more tentatively having become genuinely vulnerable to new evidence One may not remain a believer for long On the other hand one invites fanaticism if one s faith is dangerously predicated on the assurance that no new

discovery will send one back to the drawing board Secret Scrolls assesses what each author imagines it would take to derail and debunk Christianity How mighty a blow must be dealt before the religion would fall Dan Brown's notion that a married Jesus would debunk the Nicene Creed is laughable As Wilbert Francis Howard once argued in his brief and fascinating history of New Testament research there is a genuine romance of New Testament scholarship and many of us are delighted to have the adventure continue in the speculative imaginations of capable novelists These books can both entertain and educate and so will Secret Scrolls

The New Psychology of Leadership S. Alexander Haslam, Stephen D. Reicher, Michael J. Platow, 2010-09-13 Winner of the University of San Diego Outstanding Leadership Book Award 2012 Shortlisted for the British Psychological Society Book Award 2011 Shortlisted for the CMI Chartered Management Institute Management Book of the Year Award 2011 2012 According to John Adair the most important word in the leader's vocabulary is we and the least important word is I But if this is true it raises one important question why do psychological analyses of leadership always focus on the leader as an individual as the great I One answer is that theorists and practitioners have never properly understood the psychology of we ness This book fills this gap by presenting a new psychology of leadership that is the result of two decades of research inspired by social identity and self categorization theories The book argues that to succeed leaders need to create champion and embed a group identity in order to cultivate an understanding of us of which they themselves are representative It also shows how by doing this they can make a material difference to the groups organizations and societies that they lead Written in an accessible and engaging style the book examines a range of central theoretical and practical issues including the nature of group identity the basis of authority and legitimacy the dynamics of justice and fairness the determinants of followership and charisma and the practice and politics of leadership The book will appeal to academics practitioners and students in social and organizational psychology sociology political science and anyone interested in leadership influence and power
