Modelling Seasonality:

The Econometric Analysis of Seasonal Time Series Eric Ghysels, Denise R. Osborn, 2001-06-18 Eric Ghysels and Denise R Osborn provide a thorough and timely review of the recent developments in the econometric analysis of seasonal economic time series summarizing a decade of theoretical advances in the area The authors discuss the asymptotic distribution theory for linear nonstationary seasonal stochastic processes They also cover the latest contributions to the theory and practice of seasonal adjustment together with its implications for estimation and hypothesis testing Moreover a comprehensive analysis of periodic models is provided including stationary and nonstationary cases The book concludes with a discussion of some nonlinear seasonal and periodic models The treatment is designed for an audience of researchers and advanced graduate students

Modelling Seasonality Svend Hylleberg, 1992 This volume brings together leading papers on the existing standard economic theory of seasonality as well as papers which apply newer statistical tools to the modelling of seasonal phenomena It includes a discussion of the X 11 method of seasonal adjustment as well as an assessment of recent developments in the field

Econometric Forecasting and High-frequency Data Analysis Roberto S. Mariano, Yiu Kuen Tse, 2008 This important book consists of surveys of high frequency financial data analysis and econometric forecasting written by pioneers in these areas including Nobel laureate Lawrence Klein Some of the chapters were presented as tutorials to an audience in the Econometric Forecasting and High Frequency Data Analysis Workshop at the Institute for Mathematical Science National University of Singapore in May 2006 They will be of interest to researchers working in macroeconometrics as well as financial econometrics Moreover readers will find these chapters useful as a guide to the literature as well as suggestions for future research Sample Chapter s Foreword 32 KB Chapter 1 Forecast Uncertainty Its Representation and Evaluation 97 KB Contents Forecasting Uncertainty Its Representation and Evaluation K F Wallis The University of Pennsylvania Models for High Frequency Macroeconomic Modeling L R Klein Forecasting Seasonal Time Series P H Franses Car and Affine Processes C Gouriéroux Multivariate Time Series Analysis and Forecasting M Deistler Readership Professionals and researchers in econometric forecasting and financial data analysis

Modelling Trends and Cycles in Economic Time Series Terence C. Mills, 2021-07-29 Modelling trends and cycles in economic time series has a long history with the use of linear trends and moving averages forming the basic tool kit of economists until the 1970s Several developments in econometrics then led to an overhaul of the techniques used to extract trends and cycles from time series In this second edition Terence Mills expands on the research in the area of trends and cycles over the last almost two decades to highlight to students and researchers the variety of techniques and the considerations that underpin their choice for modelling trends and cycles

Time Series Analysis and Macroeconometric Modelling Kenneth Frank

Wallis,1995-01-01 An excellent reference volume of this author's work bringing together articles published over a 25 year span on the statistical analysis of economic time series large scale macroeconomic modelling and the interface between them
Aslib Book Guide This major volume of essays by Kenneth F Wallis features 28 articles published over a quarter of a century on the statistical analysis of economic time series large scale macroeconomic modelling and the interface between them
The first part deals with time series econometrics and includes significant early contributions to the development of the LSE tradition in time series econometrics which is the dominant British tradition and has considerable influence worldwide Later sections discuss theoretical and practical issues in modelling seasonality and forecasting with applications in both large scale and small scale models The final section summarizes the research programme of the ESRC Macroeconomic Modelling Bureau a unique comparison project among economy wide macroeconomic models Time Series Techniques for Economists

Terence C. Mills,1990 The application of time series techniques in economics has become increasingly important both for forecasting purposes and in the empirical analysis of time series in general In this book Terence Mills not only brings together recent research at the frontiers of the subject but also analyses the areas of most importance to applied economics It is an up to date text which extends the basic techniques of analysis to cover the development of methods that can be used to analyse a wide range of economic problems The book analyses three basic areas of time series analysis univariate models multivariate models and non linear models In each case the basic theory is outlined and then extended to cover recent developments Particular emphasis is placed on applications of the theory to important areas of applied economics and on the computer software and programs needed to implement the techniques This book clearly distinguishes itself from its competitors by emphasising the techniques of time series modelling rather than technical aspects such as estimation and by the breadth of the models considered It features many detailed real world examples using a wide range of actual time series It will be useful to econometricians and specialists in forecasting and finance and accessible to most practitioners in economics and the allied professions Statistical Modelling in Biostatistics and Bioinformatics Gilbert MacKenzie,Defen

Peng,2014-05-08 This book presents selected papers on statistical model development related mainly to the fields of Biostatistics and Bioinformatics The coverage of the material falls squarely into the following categories a Survival analysis and multivariate survival analysis b Time series and longitudinal data analysis c Statistical model development and d Applied statistical modelling Innovations in statistical modelling are presented throughout each of the four areas with some intriguing new ideas on hierarchical generalized non linear models and on frailty models with structural dispersion just to mention two examples The contributors include distinguished international statisticians such as Philip Hougaard John Hinde Il Do Ha Roger Payne and Alessandra Durio among others as well as promising newcomers Some of the contributions have come from researchers working in the BIO SI research programme on Biostatistics and Bioinformatics centred on the Universities of Limerick and Galway in Ireland and funded by the Science Foundation Ireland under its Mathematics Initiative

Seasonality, Rural Livelihoods and Development Stephen Devereux, Rachel Sabates-Wheeler, Richard

Longhurst, 2013-07-03 Seasonality is a severe constraint to sustainable rural livelihoods and a driver of poverty and hunger particularly in the tropics. Many poor people in developing countries are ill equipped to cope with seasonal variations which can lead to drought or flood and consequences for agriculture, employment, food supply and the spread of disease. The subject has assumed increasing importance as climate change and other forms of development disrupt established seasonal patterns and variations. This book is the first systematic study of seasonality for over twenty years and it aims to revive academic interest and policy awareness of this crucial but neglected issue. Thematic chapters explore recent shifts with profound implications for seasonality including climate change, HIV/AIDS and social protection. Case study chapters explore seasonal dimensions of livelihoods in Africa (Ethiopia, Kenya, Malawi), Asia (Bangladesh, China, India) and Latin America (Peru). Others assess policy responses to adverse seasonality for example through irrigation, migration and seasonally sensitive education. The book also includes innovative tools for monitoring seasonality which should enable more appropriate responses. *Handbook of Applied Economic Statistics* Aman Ullah, 1998-02-03 This work examines theoretical issues as well as practical developments in statistical inference related to econometric models and analysis. This work offers discussions on such areas as the function of statistics in aggregation, income inequality, poverty, health, spatial econometrics, panel and survey data, bootstrapping and time series.
