

IMPROVISATIONAL MODELS OF MUSIC THERAPY

KENNETH E. BRUSCIA, PH.D., CMT

*Professor of Music Therapy
Temple University
Philadelphia, Pennsylvania*

This comprehensive guide introduces the fundamentals of improvisational music therapy, surveys over 25 models of therapy, and synthesizes the various models into basic principles of clinical practice. Specific models described include creative music therapy, free improvisation therapy, analytical music therapy, experimental improvisation therapy, Dyfi improvisation models, paraverbal therapy, and other miscellaneous models. Each model is described in a uniform manner—background, clinical uses, goals, age in format, instruments and evaluation, preparation for a session, clinical theory (philosophy, stages of therapy), and sources—to provide a solid foundation for an in-depth comparison of the different models.
