Models Of Ancient Greek Philosophy:

Models of Ancient Greek Philosophy Warren A. Shibles, 1974 Models of the History of Philosophy: From its Origins in the Renaissance to the 'Historia Philosophica' Francesco Bottin, Giovanni Santinello, 1993-08-31 This volume grew out of a conference held at the Warburg Institute of London in June 1989 in memory of Charles B Schmitt The topic one to which he had given much thought was the ways knowledge changed from the Renaissance to the Enlightenment in terms of how it was classified how it was transformed in science philosophy and theology and how it was institutionalized and how it was distributed Contributions by an international group of scholars Grazia Tonelli Claire J Farago Charles Lohr Allison Coudert Nicholas Jardine Lynn S Joy Robert Black Susanna Akerman Michael Hunter and Jeremy D Popkin treat different aspects of the topic The editors Donald R Kelley and Richard H Popkin have added an introduction and an epilogue

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1973 Models and Idealizations in Science Alejandro Cassini, Juan Redmond, 2021-05-27 This book provides both an introduction to the philosophy of scientific modeling and a contribution to the discussion and clarification of two recent philosophical conceptions of models artifactualism and fictionalism These can be viewed as different stances concerning the standard representationalist account of scientific models By better understanding these two alternative views readers will gain a deeper insight into what a model is as well as how models function in different sciences Fictionalism has been a traditional epistemological stance related to antirealist construals of laws and theories such as instrumentalism and inferentialism By contrast the more recent fictional view of models holds that scientific models must be conceived of as the same kind of entities as literary characters and places This approach is essentially an answer to the ontological question concerning the nature of models which in principle is not incompatible with a representationalist account of the function of models The artifactual view of models is an approach according to which scientific models are epistemic artifacts whose main function is not to represent the phenomena but rather to provide epistemic access to them It can be conceived of as a non representationalist and pragmatic account of modeling which does not intend to focus on the ontology of models but rather on the ways they are built and used for different purposes The different essays address questions such as the artifactual view of idealization the use of information theory to elucidate the concepts of abstraction and idealization the deidealization of models the nature of scientific fictions the structural account of representation and the ontological status of structures the role of surrogate reasoning with models and the use of models for explaining and predicting physical phenomena **Greek Models of Mind and Self** A.
