Modern Concepts of Psychoanalysis. [By Various Authors.] Edited by Leon Salzman and Jules Masserman Leon SALZMAN (and MASSERMAN (Jules Hymen)), Jules Homan Masserman, 1962 *Psychiatry in Transition* John Lofland, 2021-09-28

When the first edition of *Psychiatry in Transition* came out Dr Gene Usdin wrote that to read Marmor's papers is to read not only psychiatric history but also where that history will be in the next decade That next decade has happened and Marmor's papers remain a beacon of professional endeavor This second edition includes a final chapter on Short Term Dynamic Psychotherapy in which the historical background of brief psychotherapy focusing on the contributions of Freud Ferenczi Rand and Alexander is examined and synthesized Throughout certain basic themes stand out First is the necessity for building upon a solid foundation of scientific thought coupled with a readiness to change theories that do not fit with established facts Second Marmor offers a systems theory to replace simplistic unitary or linear theories Third he presents some common denominators for illuminating the divergent views that characterize contemporary psychiatric theory and practice The whole is linked by a deep concern with betterment of the human predicament Marmor demonstrates that causation in psychiatry can be optimally understood in terms of multiple interacting variables rather than as a response to unitary factors He foreshadows and predicts developments that are now current in contemporary psychiatric practice such as the relationship between neurochemistry and behavior and group therapy with dynamic psychotherapy He also deals with the importance of cultural and socioeconomic factors in individual personality development The work concludes with a series of chapters on interethnic hostility nationalism and urban violence Marmor's work clarifies the nature of the psychoanalytic process by liberating it from obscurantism and jargon This book points the way toward unraveling some of the cognitive dissonance in this area As Leon Eisenberg observed this is an admirable vade mecum of dynamic psychiatry both for residents in training and clinicians in practice
