Fundamentals of Manufacturing For Engineers T F Waters,2017-07-12 This textbook will be welcomed throughout engineering education as the one stop teaching text for students of manufacturing It takes the student through the fundamental principles and practices of modern manufacturing processes in a lively and informative fashion Topics include casting joining cutting metal deformation processes surface treat Modern Joining Processes Harrison Bryan,1966

Joining Processes for Dissimilar and Advanced Materials Pawan Kumar Rakesh,J. Paulo Davim,2021-11-13 Joining Processes for Dissimilar and Advanced Materials describes how to overcome the many challenges involved in the joining of similar and dissimilar materials resulting from factors including different thermal coefficients and melting points Traditional joining processes are ineffective with many newly developed materials The ever increasing industrial demands for production efficiency and high performance materials are also pushing this technology forward The resulting emergence of advanced micro and nanoscale material joining technologies have provided many solutions to these challenges Drawing on the latest research this book describes primary and secondary processes for the joining of advanced materials such as metals and alloys intermetallics ceramics glasses polymers superalloys electronic materials and composites in similar and dissimilar combinations It also covers details of joint design quality assurance economics and service life of the product Provides valuable information on innovative joining technologies including induction heating of metals ultrasonic heating and laser heating at micro and nanoscale levels Describes the newly developed modelling simulation and digitalization of the joining process Includes a methodology for characterization of joints **Sustainable Manufacturing Processes** R. Ganesh

Narayanan,Jay S. Gunasekera,2022-10-08 Sustainable Manufacturing Processes provides best practice advice on sustainable manufacturing methods with examples from industry as well as important supporting theory In the current manufacturing industry processes and materials are developed with close reference to sustainability issues with an outward look to optimum production efficiency and reduced environmental impact Important topics such as the use of renewable energy reduction of material waste and recycling reduction in energy and water consumption and reduction in emissions are all discussed along with broad coverage of deformation and joining technologies computational techniques and computer aided engineering In addition a wide range of traditional and innovative manufacturing technologies are covered including friction stir welding incremental forming abrasive water jet machining laser beam machining sustainable foundry porous material fabrication by powder metallurgy laser and additive manufacturing and thermoelectric and thermomagnetic energy harvesting Features practical case studies from industry experts Explains methods for reducing waste in additive manufacturing Provides a detailed examination on how sustainability is measured in manufacturing *Springer Handbook of Mechanical Engineering* Karl-Heinrich Grote,Erik K. Antonsson,2009-01-13 This resource covers all areas of interest for the practicing engineer as

well as for the student at various levels and educational institutions It features the work of authors from all over the world who have contributed their expertise and support the globally working engineer in finding a solution for today s mechanical engineering problems Each subject is discussed in detail and supported by numerous figures and tables

EARLY METALLURGY IN NIGERIA Adeniyi A. Afonja, Humankind is believed to have existed in Africa for over 6 million years based on the dating of excavated fossils Transformations took place over time in response to severe climate changes and the Modern Human believed to be the first to spread beyond Africa evolved only about 2 million years ago and did not move to other parts of the world until about 200 000 years ago What is now known about ancient human history came from several sources paleontologists excavate and evaluate human and article fossils dating back 2 3 million years archaeologists excavate ancient sites and study recovered articles mostly dating back 40 60 000 years historians study oral and recorded history but the scope is limited to about 3 000 years when writing was invented Archaeometallurgy evolved in the second half of the last century and has become a major tool for the study of ancient metals metalworking structures tools waste products and finished artifacts using techniques from the physical sciences While this does not in anyway distract from the traditional approach of other archaeo scientists it is a very valuable complement since it provides in depth information about ore and slag composition furnace design macro and micro analysis of objects all of which give vital information about the probable production techniques Materials have played a central role throughout human history starting with stone flint wood straw and transitioning to metals around ten to twelve thousand years ago In fact the major stages of historical evolution are delineated by the materials that were in prominent use Stone Age Bronze Age Iron Age etc If Africa is indeed the cradle of humankind then it should have a very rich archaeo history but most of the discoveries so far have been accidental This book presents the results of a comprehensive study of the rich early archeometallurgical history of Nigeria which dates back to around 800 BC in the context of early world metallurgy Issues treated include probable socio ethno cultural settings practices in the context of early world metal cultures provenance of technologies and local technological innovations
