Modern Manufacturing Processes Kaushik Kumar, J. Paulo Davim, 2020-05-22 *Modern Manufacturing Processes* draws on the latest international research on traditional and non traditional practices to provide valuable advice on the digitization and automation of the manufacturing industry. In addition to providing technical details for the correct implementation of the latest tools and practices, the impacts on productivity and design quality are also examined. The thorough classification of manufacturing processes will help readers to decide which technology is most effective for their requirements and comparisons between modern and traditional methods will clarify the case for upgrading. This comprehensive assessment of technologies will include additive manufacturing and industry 4.0 as well as hybrid methods where exceptional results have been gained through the use of traditional technology. This collection of work by academics at the cutting edge of manufacturing research will help readers from a range of backgrounds to understand and apply these new technologies. Explains how the correct implementation of modern manufacturing processes can help a factory gain the characteristics of an industry 4.0 business. Explores what the main technical and business drivers for new manufacturing processes are today. Provides detailed classifications and comparisons of traditional, non traditional and hybrid manufacturing processes.
