Modern Control System Theory and Design Stanley M. Shinnars, 1998-05-06 The definitive guide to control system design Modern Control System Theory and Design Second Edition offers the most comprehensive treatment of control systems available today Its unique text software combination integrates classical and modern control system theories while promoting an interactive computer based approach to design solutions The sheer volume of practical examples as well as the hundreds of illustrations of control systems from all engineering fields make this volume accessible to students and indispensable for professional engineers This fully updated Second Edition features a new chapter on modern control system design including state space design techniques Ackermann

s formula for pole placement estimation robust control and the H method for control system design Other notable additions to this edition are Free MATLAB software containing problem solutions which can be retrieved from The Mathworks Inc anonymous FTP server at <ftp://ftp.mathworks.com/pub/books/shinners> Programs and tutorials on the use of MATLAB incorporated directly into the text A complete set of working digital computer programs Reviews of commercial software packages for control system analysis An extensive set of new worked out illustrative solutions added in dedicated sections at the end of chapters Expanded end of chapter problems one third with answers to facilitate self study An updated solutions manual containing solutions to the remaining two thirds of the problems Superbly organized and easy to use Modern Control System Theory and Design Second Edition is an ideal textbook for introductory courses in control systems and an excellent professional reference Its interdisciplinary approach makes it invaluable for practicing engineers in electrical mechanical aeronautical chemical and nuclear engineering and related areas

Modern Control System Theory M. Gopal, 1993 About the book The book provides an integrated treatment of continuous time and discrete time systems for two courses at postgraduate level or one course at undergraduate and one course at postgraduate level It covers mainly two areas of modern control theory namely system theory and multivariable and optimal control The coverage of the former is quite exhaustive while that of latter is adequate with significant provision of the necessary topics that enables a research student to comprehend various technical papers The stress is on interdisciplinary nature of the subject Practical control problems from various engineering disciplines have been drawn to illustrate the potential concepts Most of the theoretical results have been presented in a manner suitable for digital computer programming along with the necessary algorithms for numerical computations

Modern Control Systems Analysis and Design Using MATLAB and SIMULINK Robert H. Bishop, 1997 This supplement is meant for professors looking for ways to integrate more of the design process into their undergraduate controls course as well as improve their students computer skills In each chapter a problem from the Modern Control Systems textbook has been changed into a design problem and various aspects of the design process are explored

Modern Control Systems Engineering Zoran Gajic, Zoran Gajić, M. Lelić, 1996 The book represents a modern treatment of classical control theory and application concepts Theoretically it is based on the state space approach where the main concepts have been derived using only the knowledge from a first course in linear algebra Practically it is based on the MATLAB package for computer aided control system design so that the presentation of the design techniques is simplified The inclusion of MATLAB allows deeper insights into the dynamical behaviour of real physical control systems which are quite often of high dimensions Continuous time and discrete time control systems are treated simultaneously with a slight emphasis on the continuous time systems especially in the area of controller design Instructor's Manual 0 13 264730 3
