Rulers, Religion, and Riches Jared Rubin, 2017-02-16 For centuries following the spread of Islam the Middle East was far ahead of Europe Yet the modern economy was born in Europe Why was it not born in the Middle East In this book Jared Rubin examines the role that Islam played in this reversal of fortunes It argues that the religion itself is not to blame the importance of religious legitimacy in Middle Eastern politics was the primary culprit Muslim religious authorities were given an important seat at the political bargaining table which they used to block important advancements such as the printing press and lending at interest In Europe however the Church played a weaker role in legitimizing rule especially where Protestantism spread indeed the Reformation was successful due to the spread of printing which was blocked in the Middle East It was precisely in those Protestant nations especially England and the Dutch Republic where the modern economy was born

The Origins and Development of Financial Markets and Institutions Jeremy Atack, Larry Neal, 2009-03-16 Collectively mankind has never had it so good despite periodic economic crises of which the current sub prime crisis is merely the latest example Much of this success is attributable to the increasing efficiency of the world's financial institutions as finance has proved to be one of the most important causal factors in economic performance In a series of insightful essays financial and economic historians examine how financial innovations from the seventeenth century to the present have continually challenged established institutional arrangements forcing change and adaptation by governments financial intermediaries and financial markets Where these have been successful wealth creation and growth have followed When they failed growth slowed and sometimes economic decline has followed These essays illustrate the difficulties of coordinating financial innovations in order to sustain their benefits for the wider economy a theme that will be of interest to policy makers as well as economic historians

Accounting by the First Public Company Warwick Funnell,Jeffrey Robertson,2013-11-12

The United Dutch East India Company was the first public company preceding the formation of the English East India Company by over 40 years Its fame as the first public company which heralded the transition from feudalism to modern capitalism and its remarkable financial success for nearly two centuries ensure its importance in the history of capitalism Although a publicly owned highly complex and diversified business and commonly agreed to be the largest and most profitable business in the 17th century throughout its existence the Dutch East India Company never produced public accounts of its financial affairs which would have allowed investors to judge the performance of the Company Its financial accounting which changed little during its lifetime was not designed as an aid to rational investment decision making by communicating the Company s financial performance but to be a means of promoting sound stewardship by senior management This study examines the contributions of accounting to the remarkable success of the Dutch East India Company and the influences on these accounting practices From the time that the German economic historian Werner Sombart proposed that accounting techniques most especially double entry bookkeeping were critical to the development of modern capitalism and the public company historians and accounting scholars have debated the extent and importance of these contributions The Dutch East India Company was a capitalistic enterprise that had a public permanent capital and its principal objective was to continually increase profit by reinvesting its returns in the business Rather than the organisation and management of the Dutch East India Company reflecting the perceived benefits of a particular bookkeeping method the supremacy that it achieved and maintained in a very hazardous business at a time of recurring conflict between European states was a consequence of the practicalities of 17th century business and The Netherlands unique threatening natural environment which shaped its social and political institutions
