

The top half of the cover features an abstract painting. It depicts two faces in profile, facing each other. The face on the left is defined by a thin black outline and contains a large, solid red circle. The face on the right is more complex, with multiple eyes and a green, mountain-like shape at its base. The background is a textured mix of yellow, orange, and brown. A large, solid red circle is positioned in the bottom right corner, partially overlapping the title text.

Modern Philosophy Of Language:

Modern Philosophy of Language Maria Baghramian, 1999-09-17 A collection of seminal writings on the philosophy of language In our century philosophers have become increasingly concerned with the relationship between language the mind and the world Language has come to be viewed both as a source of puzzlement and as a repository for untapped knowledge The philosophy of language is an attempt to understand the nature of language and to explore the link between what we say and what we intend Modern Philosophy of Language brings together the most significant writings on language in twentieth century philosophy from the work of Gottlob Frege Bertrand Russell and the logical positivists to the contemporary contributions of W V O Quine Noam Chomsky and Michael Dummett The articles collected here are benchmarks in the development of various strands in the modern analytic philosophy of language

Skepticism and Language in Early Modern Philosophy Danilo Marcondes, 2020-12-10 Danilo Marcondes argues that contrary to a traditional view maintaining that language is not given any central role in early modern philosophy an early linguistic turn in the seventeenth century opened a place for the philosophy of language as part of the philosophical system then under construction Skepticism and Language in Early Modern Philosophy The Early Linguistic Turn also claims that the revival of ancient skepticism at the modern age contributed decisively towards this linguistic turn insofar as it attacked the powers of the intellect in representing reality and making knowledge possible Marcondes also argues that the concept of language itself becomes crucial to this investigation since the various understandings that developed during this period led to the central role that would be given to the philosophy of language in contemporary philosophy

The Oxford Handbook of Contemporary Philosophy of Language Una Stojnić, Ernie Lepore, 2024-12-18 The Oxford Handbook of Contemporary Philosophy of

Language introduces readers to the main issues and theories in the philosophy of language as currently practised. Written by leading researchers and covering the central topics in the contemporary philosophical study of language, the twenty-seven chapters provide an overview of the state of the art and a presentation of cutting edge developments. Topics covered include the nature of language, the nature and role of semantic and attitudinal content, the dynamics of communication and speech acts, meta semantics and reference, grounding, tense and modality, discourse dynamics and information structure, and the expressive, evaluative, subjective and social aspects of language. Although some of the articles focus directly on technical issues following the recent approach of linguistically oriented philosophy of language, the majority of the contributions are primarily focused on foundational questions drawn from traditional philosophy of language. The volume offers a reconsideration of these foundational issues in a new light while still bearing in mind the formal developments in recent literature as well as a presentation of new foundational issues that have emerged as a result of these developments.

The Cambridge Companion to Modern Jewish Philosophy Michael L. Morgan, Peter Eli Gordon, 2007-06-04 Modern Jewish philosophy emerged in the seventeenth century with the impact of the new science and modern philosophy on thinkers who were reflecting upon the nature of Judaism and Jewish life. This collection of essays examines the work of several of the most important of these figures from the seventeenth to the late twentieth centuries and addresses themes central to the tradition of modern Jewish philosophy: language and revelation, autonomy and authority, the problem of evil, messianism, the influence of Kant and feminism. Included are essays on Spinoza, Mendelssohn, Cohen, Buber, Rosenzweig, Fackenheim, Soloveitchik, Strauss, and Levinas. Other thinkers discussed include Maimon, Benjamin, Derrida, Scholem, and Arendt. The sixteen original essays are written by a world-renowned group of scholars, especially for this volume, and give a broad and rich picture of the tradition of modern Jewish philosophy over a period of four centuries.
