Physics

An abstract graphic featuring a large, glowing yellow-orange sphere on the left, partially obscured by a series of blue and white light rays that curve around it. To the right, a cluster of thin, white lines radiates from a point, resembling a lens or a starburst. The background is dark blue with swirling, ethereal patterns of light blue and white.

Modern Physics Selected Readings:

Modern Physics, 1971 **Modern Physics; Selected Readings** David Webber, 1971 **Selected Writings 1909-1953** M. Reichenbach, 2012-12-06 These two volumes form a full portrait of Hans Reichenbach from the school boy and university student to the maturing and creative scholar who was as well an immensely devoted teacher and a gifted popular writer and speaker on science and philosophy We selected the articles for several reasons Many of them have not previously been available in English many are out of print either in English or in German some especially the early ones have been little known and deal with subject matters other than philosophy of science The genesis and evolution of Reichenbach's ideas appeared to be of deep interest and so we included papers from four decades despite occasional redundancy We were for example pleased to include his extensive review article from the encyclopedic *Handbuch der Physik* of 1929 on The Aims and Methods of Physical Knowledge written at a time of creative collaboration between Reichenbach's Berlin group and the Vienna Circle of Schlick and Carnap Reichenbach was a pioneer opening new pathways to the solution of age old problems in many fields space time causality induction and probability philosophical analysis and interpretation of classical physics relativity and quantum physics logic language ethics scientific explanation and methodology critical appreciation and reconstruction of past metaphysical thinkers and scientists from Plato to Leibniz and Kant Indeed his own philosophical journey was initiated by his passage from Kant to anti Kant **Michael Oakeshott Selected Writings Collection** Michael Oakeshott, 2014-08-26 A collection of 6 volumes of Oakeshott's work Notebooks 1922-86 Early Political Writings 1925-30 The Concept of a Philosophical Jurisprudence Vocabulary of a Modern European State Lectures in the History of Political Thought and What is History **Selected Writings of Richard McKeon** Richard P. McKeon, 1998-03-28 Richard McKeon 1900-1985 taught philosophy at the University of Chicago from 1935 to 1973 and at the time of his death had published eleven books and 158 articles on an extraordinary array of topics and cultures This first volume of an ambitious three volume work covers philosophic theory through McKeon's writings on first philosophy metaphysics and the methods and principles of the sciences *Catalog of Information* United States Military Academy, 1949 **Selected Writings: 1927-1934** Walter Benjamin, Howard Eiland, Gary Smith, 1996 Comprising more than 65 pieces journal articles reviews extended essays sketches aphorisms and fragments this volume shows the range of Walter Benjamin's writing His topics here include poetry fiction drama history religion love violence morality and mythology *Annual Catalogue* College of Hawaii, 1924 **Selected Writings** Walter Benjamin, 2004 In the final years of the Weimar Republic Benjamin emerged as the most original public intellectual in the German speaking world Here Benjamin is represented by two of his greatest literary essays Surrealism and On the Image of Proust as well as by an article on Goethe and a selection of his wide ranging commentary for German newspapers **The Selected Writings of Maurice O'Connor Drury** Maurice O'Connor Drury, 2017-09-21 Maurice O'Connor Drury was among Wittgenstein's first students after his return to Cambridge in 1929 The subsequent course of Drury's life

and thought was to be enormously influenced by his teacher from his decision to become a doctor to his later work in psychiatry. The Selected Writings of Maurice O'Connor Drury brings together the best of his lectures, conversations, and letters on philosophy, religion, and medicine. Central to the collection is the *Danger of Words*, the 1973 text described by Ray Monk as the most truly Wittgensteinian book published by any of Wittgenstein's students. Through notes on conversations with Wittgenstein, letters to a student of philosophy, and correspondence of almost 30 years with Rush Rhees, Drury gives shape to what he had learned from Wittgenstein. Whether discussing methods of philosophy, Simone Weil, or the power of hypnosis, he makes fascinating excursions into the bearing of Wittgenstein's thought on philosophy and the practice of medicine and psychiatry. With an introduction presenting a new biography of Drury, analysing the relationship between him and Wittgenstein, *The Selected Writings of Maurice O'Connor Drury* features previously unpublished archival sources. Beautifully written and carefully selected, each piece reveals the impact of Wittgenstein's teachings, shedding light on the friendship and thinking of one of the most important philosophers of the 20th century.
