Nonlinear Deformation Waves Symposium Iutam Symposium Tallinn Estonian Ssr 1982:

Nonlinear Deformation Waves U. Nigul, J. Engelbrecht, 1983-05 Recent progress in the study of nonlinear wave propagation has been influenced by developments in mechanics acoustics hydro dynamics plasma physics and many other fields of physics This vast field of research has also given rise to fascinating mathematical ideas the inverse scattering method and the technique of exterior differential forms being just some to be mentioned Obviously the theory of nonlinear waves may be interpreted as an interdisciplinary study with the mechanics of continuous media as a theoretical basis This was the starting point of the proposal to the General Assembly of the IUTAM to hold an IUTAM Symposium on this topic made by the USSR National Committee of Theoretical and Applied Mechanics and the Academy of Sciences of the Estonian SSR Actually the IUTAM Symposium on Nonlinear Deformation Waves was the third meeting of such kind to be held in Tallinn In 1973 the Academy of Sciences of the Estonian SSR and Gorky State University organized a national Symposium on Nonlinear and Thermal Effects in Transient Wave Propagation In 1978 the Academy of Sciences of the Estonian SSR organized another national Symposium on Nonlinear Deformation Waves with participants from several other countries The participants of this Symposium in their final resolution expressed a wish that a similar meeting of definitely international type should take place again in Tallinn in 1982

Laminar-Turbulent Transition Victor V. Kozlov, 2012-12-06 At the suggestion of the USSR National Committee of Theoretical and Applied Mechanics the International Union of Theoretical and Applied Mechanics made a decision to organize the Second IUTAM Symposium on Laminar Turbulent Transition in Novosibirsk Professor Yanenko was entrusted to be the chairman of the scientific committee It was proposed that about 100 scientists would participate in the Symposium and that 60 lectures and invited lectures would be delivered as for the theme of the Symposium it was devoted to experimental and theoretical studies of laminar turbulent transition in fluids and gases i.e. the physical problems of transition and mathematical modeling in shear flows It was planned to lay a special emphasis on fundamental mechanisms of the transition process The scientific committee approved of the scope of the Symposium having considered the changes in the directions of the studies which took place since the First Symposium For example there was singled out the problem of transformation of external disturbances into eigenoscillations of shear flows i.e. the receptivity problem which was only slightly touched upon

at the First Symposium A new section appeared devoted to the inter relation of the flow separation phenomenon and its stability It was planned to focus the attention on the secondary instability at transition to turbulence at the non linear stage of the flow breakdown as well as on the loss of stability and the disturbances development in 3 D flows *Revista di scienza, organo internazionale di sintesi scientifica* ,1984 **Probabilistic Methods in the Mechanics of Solids and Structures**

S. Eggwertz,N.C. Lind,2012-12-06 The IUTAM Symposium on Probabilistic Methods in the Mechanics of Solids and Structures dedicated to the memory of Waloddi Weibull was held in Stockholm Sweden June 19 21 1984 on the initiative of the Swedish National Committee for Mech anics and the Aeronautical Research Institute of Sweden FFA The purpose of the symposium was to bring together mathema ticians that develop the theory of stochastic processes and methods for reliability analysis with engineers that apply these theories and methods to model loads strengths and structures for the advancement of structural safety Waloddi Weibull was a pioneer in this field with his many publi cations from the thirties until his death in 1979 He also took an active part in the formation of the International Union of Theoretical and Applied Mechanics during the forties and subsequently initiated foundation of the Swedish National Committee for Mechanics through which Sweden joined IUTAM as a member 116 participants from 21 countries attended the symposium and 55 invited papers were presented in 7 scientific sessions *Applied Mechanics Reviews* ,1984 Report International Union of Theoretical and Applied Mechanics,1995

Measuring Techniques in Gas-Liquid Two-Phase Flows J.M. Delhaye,G. Cognet,2012-12-06 A IUTAM symposium on Measuring Techniques in Gas Liquid Two Phase Flows was held on July 5 8 1983 in Nancy France This topic in cluded instrumentation for steam water and liquid vapor flows but strictly excluded measuring techniques for gas or liquid flows with solid particles The top priority in the paper selection was given to presentations of new methods which had been substantiated by theoretical modeling calibration tests and comparison tests with other techniques Examples of experimental resul ts obtained with the proposed instrumentation had to be displayed However the interpretation of these results in terms of two phase flow or heat transfer modeling did not fall wi thin the scope of the meeting Thirty four papers were presented during the Symposium and 79 participants coming from Canada European countries Japan and the United States attended the sessions They represented not only Universities but also state agencies and private companies After the meeting each paper was peer reviewed by at least three referees The Editors of this Procee dings Volume are pleased to extend their deep gratitude to the following reviewers J L Achard R J Adrian B Azzopardi J A Boure G Costigan M Courtaud A E Dukler F Durst J R Fincke G Gouesbet P Griffith T J Hanratty A Hawighorst T R Heidrick G Hetsroni Y Y Hsu M
