Program has been established to support the education of students in Nuclear Engineering Programs to maintain a knowledgeable workforce in the United States in order to keep nuclear power as a viable component in a mix of energy sources for the country. The involvement of the utility industry ensures that this grant program satisfies the needs and requirements of local nuclear energy producers and at the same time establishes a strong linkage between education and day to day nuclear power generation. As of 1997, seventeen pairs of university utility partners existed. UMCP was never a member of that group of universities but applied for the first time with a proposal to Baltimore Gas and Electric Company in January 1999. This proposal was generously granted by BG E 2 3 in the form of a gift in the amount of 25 000 from BG E s Corporate Contribution Program. Upon the arrival of a newly appointed Director of Administration in the Department of Materials and Nuclear Engineering, the BG E check was deposited into the University s Maryland Foundation Fund. The receipt of the letter and the check enabled UMCP to apply for DOE s matching funds in the same amount by a proposal.
