Nuclidesnet An Integrated Environment For Computations On Radio Nuclides And Their Radiation:

Nuclides.net Joseph Magill,2012-12-06 Nuclides net describes an integrated environment for computations on radionuclides and their radiation In addition to providing the necessary background on radionuclides and radiation the accompanying CD ROM for Microsoft Windows operating systems offers extensive information on the physics and radiology of familiar nuclides Through an electronic nuclide chart the user can access codes via the Internet for a number of applications which allow the required data to be computed quickly and reliably by means of interactive user guidance Nuclides net can be used for teaching research and for practical applications **Radioactivity Radionuclides Radiation**

Joseph Magill,Jean Galy,2005-10-14 Offers basic data on more than 3 600 radionuclides Emphasizes practical application such as basic research archeology and dating medical radiology and industrial Balanced and informative details on the biological effects of radiation and resultant controversy Trimmed down student version of a product that costs many times the price Radiochemistry and Nuclear Chemistry - Volume I Sandor Nagy,2009-08-25 Radiochemistry and Nuclear Chemistry theme is a component of Encyclopedia of Chemical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The content of the Theme on Radiochemistry and Nuclear Chemistry provides the essential aspects and a myriad of issues of great relevance to our world such as Isotope Effects Isotope Separation and Isotope Fractionation Radiometric Dating and Tracing Radiochemical Techniques Radionuclides in Chemical Research Nuclear Methods in Material Research Radiation Chemistry Radiation Biology and Radiation Protection Radiochemistry and Radiopharmaceutical Chemistry for Medicine Chemistry of the Actinide Elements Production And Chemistry Of Transactinide Elements Nuclear Waste Management and the Nuclear Fuel Cycle High intensity Lasers in Nuclear Science Nuclear Forensics Nuclear Processes in Nature Subatomic Particles Nuclear Structure and Stability These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs Radionuclide Concentrations in Food and the Environment Michael Poschl,Leo M.L. Nollet,2006-08-21 As radiological residue both naturally occurring and technologically driven works its way through the ecosystem we see its negative effects on the human population Radionuclide Concentrations in Food and the Environment addresses the key issues concerning the relationship between natural and manmade sources of environmental radioactivity *Advances in Destructive and Non-destructive Analysis for Environmental Monitoring and Nuclear Forensics* International Atomic Energy Agency,2003 The illicit trafficking of nuclear material has been an issue of concern since the first seizures in the early 1990s and has gained increased attention in the context of the recent discussions on the possibilities of nuclear terrorism The aim of this conference was to promote the further development of nuclear forensic methods and international co operation among laboratories Another aim was to facilitate access to such capabilities by national law enforcement authorities in investigating

and prosecuting nuclear crimes to enhance co operation and to bring nuclear forensic methodology to a broader audience These proceedings include the keynote addresses invited papers panel discussions session summaries and an executive summary

Microsystems for Bioelectronics Victor V. Zhirnov, Ralph K. Cavin III, 2010-11-23 Microsystems for Bioelectronics is the ultimate guide in the biomedical application industry It provides a physics based assessment of the limitless potential of miniaturization technologies This book goes far beyond the complete design of the final systems It also discusses the developments of computation and communication subsystems The future of this technology lies in understanding the scaling limits for the individual systems This includes all of its components and the fundamental energy source that powers all autonomous microsystems Rapid advances in microfabrication technologies are offering new opportunities and capabilities to develop systems for biomedical applications These applications include the diagnostics community and those that are active in therapy services Microsystems for Bioelectronics is one of the only books on the market today that goes into the comprehensive treatment of integrated microsystems

Analytical Methods for Nonproliferation Edward C. Morse, 2016-04-04 This book is intended to be used as a textbook and research reference for the field of nuclear nonproliferation The book is primarily technical and focussed on methods of detecting clandestine nuclear material that might be illicitly transported The book also touches on nuclear forensics i e methods for identification attribution and establishment of transport pathways for illicit nuclear material Also covered are topics of methods used for arms control and treaty verification and an assessment of technologies under development for all of the above A description of the government and international agencies involved in nuclear terrorism prevention nuclear safeguards and arms control is also included

International Conference on Nuclear Data for Science and Technology, Santa Fe, New Mexico, 26 September-1 October 2004 Robert C. Haight, 2005 **CERN Courier** , 2003 Implications of Partitioning and Transmutation in Radioactive Waste Management International Atomic Energy Agency, 2004 Partitioning and transmutation P T is a potential complementary route in the management of spent fuel resulting from the generation of nuclear power It has the potential to open new avenues for long term waste management by eliminating long term radionuclides and their thermal effects and thus reducing the necessity or capacities of disposal facilities Recycling and reuse of nuclear material and other transuranic radioisotopes would have positive effects on the sustainability of nuclear energy and reduce proliferation concerns by burning nuclear material and other transuranic radionuclides This report analyses from an international perspective the current status of P T the potential options for its implementation and its impact on waste management programmes and strategies
