Population Dynamics, Reproduction, and Activities of the Kangaroo Rat, *Dipodomys Ordii*, in Western Texas

Herschel Whitaker Garner, 1970 *Wildlife Abstracts* U.S. Fish and Wildlife Service, 1954 **Wildlife of Nebraska** Paul A. Johnsgard, 2020-10 In *Wildlife of Nebraska A Natural History* Paul A. Johnsgard surveys the variety and biology of more than six hundred Nebraska species. Narrative accounts describe the ecology and biology of the state's birds, its mammals, and its reptiles and amphibians, summarizing the abundance, distributions, and habitats of this wildlife. To provide an introduction to the state's major ecosystems, climate, and topography, Johnsgard examines major public access natural areas, including national monuments, wildlife refuges, and grasslands, state parks, and wildlife management areas and nature preserves. Including more than thirty-five line drawings by the author, along with physiographic, ecological, and historical maps, *Wildlife of Nebraska* is an essential guide to the wildlife of the Cornhusker State.

Wyoming Wildlife Paul Johnsgard, Tom Mangelsen, 2019-06-26 This book surveys Wyoming's mammal, bird, reptile, and amphibian faunas. In addition to introducing the state's geography, geology, climate, and major ecosystems, it provides 65 biological profiles of 72 mammal species, 195 profiles of 196 birds, 9 profiles of 12 reptiles, and 6 profiles of 9 amphibians. There are also species lists of Wyoming's 117 mammals, 445 birds, 22 reptiles, and 12 amphibians. Also included are descriptions of nearly 50 national and state properties, including parks, forests, preserves, and other public access natural areas in Wyoming. The book includes a text of more than 150,000 words, nearly 700 references, a glossary of 115 biological terms, nearly 50 maps, and line drawings by the author, and 33 black-and-white photographs by Thomas D. Mangelsen.

Mammals of Colorado, Second Edition David M. Armstrong, James P. Fitzgerald, Carron A. Meaney, 2011-05-18 Co-published with the Denver Museum of Nature Science. Thoroughly revised and updated, *Mammals of Colorado, Second Edition* is a comprehensive reference on the nine orders and 128 species of Colorado's recent native fauna, detailing each species' description, habitat, distribution, population, ecology, diet, and foraging, predators, and parasites, behavior, reproduction, and development, and population status. An introductory chapter on Colorado's environments, a discussion of the development of the fauna over geologic time, and a brief history of human knowledge of Coloradoan mammals provide ecological and evolutionary context. The most recent records of the state's diverse species, rich illustrations including detailed maps, skull drawings, and photographs, and an extensive bibliography make this book a must-have reference. Amateur and professional naturalists, students, vertebrate biologists, and ecologists, as well as those involved in conservation and wildlife management in Colorado, will find value in this comprehensive volume.

Wildlife Review, 1974 *Idaho National Engineering Laboratory Radioecology and Ecology Programs*, 1983

Asdell's Patterns of Mammalian Reproduction Virginia Douglass Hayssen, Ari Van Tienhoven, Ans Van Tienhoven, 1993 Since the appearance of the second edition of Sydney A. Asdell's widely used *Patterns of Mammalian Reproduction* in 1964, the field of reproductive physiology has expanded dramatically. Accordingly, this revision adopts a different structure from

previous editions substituting empirical delineations for physiological interpretations With the emphases now on a presentation of the published facts of mammalian reproduction it provides a thorough compilation of what is known about the basic reproductive biology of each of the 4300 mammalian species To gather information the authors examined more than 20 000 publications dating up to 1992 They used primary sources as much as possible supplementing them with English translations of Russian Finnish Chinese and Japanese journals The data are presented in taxonomic order Each familial account summarizes the pattern of reproduction for the family and provides lists of citations arranged by topic of the literature on the endocrinology reproductive anatomy and reproductive physiology of the family Following each account is a tabular listing of species specific data for neonatal mass and size weaning mass and size litter size age at sexual maturity estrous cycle length gestation length lactation length number of litters per year and seasonality of reproduction For each of these reproductive variables the range of data gleaned from the literature is given together with the source of each value listed Virginia Hayssen is Assistant Professor of Biology at Smith College Ari Van Tienhoven is Professor of Animal Physiology Emeritus at Cornell University Ans Van Tienhoven assisted in the compilation of data for the book **Wild Mammals of North America** George A. Feldhamer, Bruce C. Thompson, Joseph A. Chapman, 2003-11-19 Table of contents *Great Wildlife of the Great Plains* Paul A. Johnsgard, 2003 Provides an overview of 121 birds mammals and reptiles native to the Great Plains organized by habitat with information on each animal s behavior and ecology *The Nature of Nebraska* Paul A. Johnsgard, 2005-01-01 Where the eastern and western currents of American life merge as smoothly as one river flows into another is a place called Nebraska There we find the Platte a river that gave sustenance to the countless migrants who once trudged westward along the Mormon and Oregon trails We find the Sandhills a vast region of sandy grassland that represents the largest area of dunes and the grandest and least disturbed region of mixed grass prairies in all the Western Hemisphere And below it all we find the Ogallala aquifer the largest potential source of unpolluted water anywhere These ecological treasures are all part of the nature of Nebraska With characteristic clarity energy and charm Paul A Johnsgard guides us through Nebraska s incredible biodiversity introducing us to each ecosystem and the flora and fauna it sustains and inviting us to contemplate the purpose and secrets of the natural world as we consider our own roles and responsibilities in our connection with it **Journal of Mammalogy**, 1985 **Systematics of *Scalopus Aquaticus* (Linnaeus) in Texas and Adjacent States** Terry L.
