comprehensive overview to implementing mental health promotion programmes with different population groups across a range of settings This work shows how information from research can be used to inform programme development and best practice It provides examples of successful international programmes Clinical Manual of Prevention in Mental Health

Michael T. Compton,2009-10-13 According to David Satcher M D Ph D the 16th U S Surgeon General we know a great deal more about treating mental illnesses than about preventing them and promoting mental health In his foreword to Clinical Manual of Prevention in Mental Health Dr Satcher applauds this guide as timely and vital as it provides new and emerging research on the importance of prevention in mental health Clinical Manual of Prevention in Mental Health was conceived through discussions within the Prevention Committee of the Group for the Advancement of Psychiatry GAP and features contributions from 30 highly regarded clinicians and researchers who are experienced in the treatment and prevention of specific types of mental illnesses Clinical Manual of Prevention in Mental Health will help you move toward widespread adoption of mental illness prevention in your own practice setting This important new reference provides practical suggestions to help you work toward preventing or implementing preventive measures in the treatment of Mood disorders Anxiety disorders Schizophrenia Substance use disorders Suicidality Family violence Conduct disorder and other adolescent disorders Late life depression dementia and mild cognitive impairment Physical illnesses in psychiatric settings Cigarette

smoking Compared with other areas of medicine such as the prevention of infectious disease our understanding of the prevention of mental illnesses remains in a relatively nascent state especially in terms of how prevention can be incorporated into routine clinical practice The authors of the various chapters have endeavored to balance reviewing the available research knowledge with providing guidance for practicing clinicians on how such knowledge can be incorporated into everyday practice Clinical Manual of Prevention in Mental Health urges clinicians everywhere to inquire about risk factors and protective factors in patients lives in addition to focusing on the presenting problem It is the authors intent to provide mental health professionals with the knowledge and practical applications necessary to be prevention minded in all of their interactions with patients families and the community

Unmet Need in Psychiatry Gavin Andrews,Scott

Henderson,2000-01-06 This book considers ways to resolve the imbalance between the demand and supply of mental health services Treatment services in most countries reach only a minority of people identified as suffering from a mental disorder Few countries can provide adequate health services for all the mentally ill yet none has developed a rational system to decide who should be treated The questions are clear Could we develop a staged treatment process to reach all in need If not how do we decide who to treat What should the criteria be for deployment of scarce treatment resources How do we determine such criteria What are the ethical implications of applying such criteria In this pioneering work an international team of eminent psychiatrists epidemiologists health administrators economists and health planners examine these questions The result will inform and encourage all concerned with the equitable provision of mental health care

Issues in Preventive Psychiatry G. N. Christodoulou,Dusica Lecic-Tosevski,Vassilis P. Kontaxakis,1999-01-01 This volume an edition supported by the World Psychiatric Association WPA contains selected papers from the Symposium of the WPA Section of Preventive Psychiatry held during the 10th World Congress of Psychiatry together with invited papers by worldwide renowned experts in psychiatric prevention The editors emphasize that health cannot be defined only by the absence of illness but that its definition has to include the ey eexein well being of the Ancient Greeks To achieve the aim of mental health and to prevent psychiatric disorders it is essential to collaborate with all professionals involved e g teachers priests policemen journalists etc As pointed out by Norman Sartorius president of the WPA in his preface the book is likely to facilitate implementation of prevention programs and hopefully will lead to the improvement of the quality and quantity of life for many people and the society as a whole
