Language in Use Andrea E. Tyler, Mari Takada, Yiyoun Kim, Diana Marinova, 2005-03-23 Language in Use creatively brings together for the first time perspectives from cognitive linguistics language acquisition discourse analysis and linguistic anthropology The physical distance between nations and continents and the boundaries between different theories and subfields within linguistics have

made it difficult to recognize the possibilities of how research from each of these fields can challenge inform and enrich the others This book aims to make those boundaries more transparent and encourages more collaborative research The unifying theme is studying how language is used in context and explores how language is shaped by the nature of human cognition and social cultural activity Language in Use examines language processing and first language learning and illuminates the insights that discourse and usage based models provide in issues of second language learning Using a diverse array of methodologies it examines how speakers employ various discourse level resources to structure interaction and create meaning Finally it addresses issues of language use and creation of social identity Unique in approach and wide ranging in application the contributions in this volume place emphasis on the analysis of actual discourse and the insights that analyses of such data bring to language learning as well as how language shapes and reflects social identity making it an invaluable addition to the library of anyone interested in cutting edge linguistics

The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy E. Virginia Demos, 2019-03-04 The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy explores central issues in current clinical work using the theories put forward by Silvan Tomkins and presenting them in detail as well as integrating them with the most up to date neuroscience findings and infancy research all based on a biopsychosocial dynamic systems approach Part I describes the essentials of life based on our evolutionary and biological heritage namely a need for a coherent understanding of one's world and the capacity to act in that world the infant's capacities are described in detail as embodying both Longitudinal data is provided beginning at birth into the third year of life Part II reviews current debates in psychoanalysis relating to motivation and the lack of an internally consistent theory Recent neuroscience findings are presented which both negate drive theory and support Tomkins theory His theory is then described in detail In Part III two case histories are presented one is a clinical case illustrating one of Tomkins affect powered scripts The second case is drawn from a longitudinal study extending from birth into early adulthood which is made sense of with the help of Tomkins theory Demos concludes with a look at competing approaches to theory and responds to recent cognitive based attempts to disprove both Tomkins work and the latest findings from neuroscience The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy will appeal to psychoanalysts and psychoanalytic psychotherapists as well as psychiatrists psychologists social workers and psychiatric nurses
