It is well known in the scientific community that sharks aren t real This is evidenced by the fact that there is no ongoing debate about their existence The lack of a debate clearly shows that there is no scientific evidence pointing to their existence Amongst the laymen the debate about whether sharks exist or not runs rampant Some fail to follow the highly regarded scientific experts and assert that sharks do live among us Some even claim to have seen one some even claim to have been bitten by one This is preposterous The lies need to stop This book will present in clear and simple terms not using a scientific method as scientists know the truth that sharks are a fictional creation of man s mind As many pranksters and frauds continue to present sharks as ruthless killing machines I will reveal the light of truth to all Sharks aren t real
