Reality Of Emotion:

On Understanding Emotion Melvin J. Lasky, 2017-07-12 Emotions fleeting insubstantial changeable and ambiguous seem to defy study and analysis Nothing is more complex mysterious and subject to conflicting theories and interpretations than human emotion Yet the central importance of emotion in human affairs is undeniable Emotions affect all levels of life personal organizational political cultural economic and religious Emotions give meaning to life Emotional disturbances can destroy that meaning How should emotions be studied How can an understanding of the inner feelings of individuals illuminate important social interactions and human developments In his book Norman Denzin presents a systematic in depth analysis of emotion that combines new theoretical advances with practical applications Based on an intensive critical examination of classical and modern theoretical research and on revealing personal interviews in which ordinary people express their emotional lives he builds a new framework for understanding ordinary emotions and emotional disturbances Denzin analyzes how people experience joy and pain love and hate anger and despair friendship and alienation and examines the personal psychological social and cultural aspects of human emotion to provide new perspectives for understanding human experience and social interactions He offers new insights on the role of emotions in family violence and recommends ways of helping people escape from recurring patterns of violence And in criticizing current conceptions of emotionally disturbed people he reveals the nature of their inner lives and the ways they perceive and relate to others In sum this book presents new insights on human relationships and human experience It is now available in paperback for the first time with a new introduction by the author

Emotions in the Digital World Robin L. Nabi, Jessica Gall Myrick, 2023 This volume will examine the ways in which rapidly changing technologies and patterns of media use influence and are influenced by our emotional experiences Through a social science lens the contributing authors explore how technology shapes our emotional experiences offering readers a nuanced interdisciplinary perspective on this increasingly relevant social phenomenon

The Mind of Consciousness Ray Morose, 2011 The Mind of Consciousness The Mind of Consciousness is a book unfolding a new way with new process methods to evaluate your existence It is an experiential work written in textbook format that analytically delineates how and why consciousness and mind interface and function exposing the inter connective dependency of non biological consciousness and the biologically created mind Knowing how that interconnectivity interrelates provides avenues of exploration that reveal the fundamental nature of existence unveiling an innate purpose and direction embedded within consciousness This book works through all the major questions of existence using reproducible and experiential logic allowing everyone to experience the results of that exploration Throughout your life you have two realities at war with one another the primary I am reality formed from non biological consciousness and the secondary I am this or that reality formed by the biological mind You may not be aware of or even appreciate the internal conflict these two inter connective and inter

dependent realities create. However you experience the resultant turmoil and confusion their subliminal battles establish by not having an experiential appreciation of how those realities are formed, function and potentially control your life. The text delineates causation for those ongoing internal battles and outlines processes to help overcome the sense of frustration, isolation and discord they generate. This experiential method of examination creates empirical processes that afford you the opportunity to make an informed choice rather than a conditioned reaction, providing a more secure, productive, directional and enjoyable life. This book takes you into the core of your being, turning it inside out, exposing who and what you are by revealing a self-created shadow world controlling your life without you being aware that control exists. **Feeling and will**

James Mark Baldwin, 1891 **Experiential Christianity** Ray Morose, 2011. Experiential Christianity. The main objective of this book is to illuminate the experiential arm of Christianity and by doing so, redefine its devotional arm. The devotional arm may guide but it takes the experiential arm to confirm. By its nature, experiential Christianity can bypass religious borders as it is not a dogma, theology or a belief but a state of experiential being. Hence, it can connect with and be beneficial to everyone regardless of his or her religious affiliation. In this reevaluation of Christianity, its living essence is revealed. That exposure reveals an experiential pathway that unveils a practical foundation for a moral compass to steer one through the various hazards of daily living. By learning to avoid those hazards, your one and only purpose in life is revealed, which is to discover the experiential reality of the statement made by Jesus that God is within you. Everything else is secondary. Meaning that experience is primary as it is used to define how one lives, acts and thinks. Based upon that experience, a moral foundation naturally arises, providing a cornerstone for ethical stances that cannot be manipulated or twisted by the many and varied seductive playthings engendered by self-interest. The depth of understanding released by the actual experiential discovery that God is within you changes your life forever; you are truly reborn. However, that experience is not achievable by belief alone. You must be willing to experientially delve into the core of your existence to discover the reality of that statement by Jesus. Meaning you must experience it and not just believe it. For that journey, you will require intellectual knowledge of how all the internal components of your existence function and interrelate. Without that knowledge, you would easily become bewildered and distressed by the confusing quantity of ambiguous information that can block your pathway and in despair claim that experience is impossible. Hence, this book outlines all the tools you need to survive that internal journey and provides a map to begin your search. Using both the tools and map is a personal decision that another cannot make for you. You either do or do not. There is no in-between. Does a non-material entity referred to as God exist? Yes. Is it possible to logically confirm that assertion? Yes. Is a personal connection to that entity possible? Absolutely. That personal connection is not hiding. You are hiding from it. This book provides all the necessary information to realize that connection. When that realization is a living reality, it transforms belief into actuality, establishing the cornerstone of an indestructible faith that underpins every thought and action in your life. That experience adds experiential authenticity to your life, confirming your
