The Really Practical Guide to Primary English Diana Bentley, 1999 This book contains clear chapter objectives suggestions for further reading on each topic and a glossary explaining key terms that the new or trainee teacher will need to understand The authors have all taught English in the primary setting are experienced teacher trainers and respected practitioners in their own specialist fields *The Primary Teacher's Guide To The New National Curriculum* Kate Ashcroft, Professor Kate Ashcroft, David Palacio, 2002-09-11 This guide gives an overview of the curriculum arrangements which took effect in August 1995 The book outlines the main changes to the original National Curriculum and gives examples of ways to teach the new curriculum together with enquiry tasks to take the teacher forward It also covers each of the subjects of the revised National Curriculum locating them within a context of whole curriculum planning Looking at issues of differentiation the book explores those additional elements of the curriculum such as cross curricular themes and drama that primary schools will wish to cover **Effective Teaching in Schools** Chris Kyriacou, 1997 This book is structured in three parts firstly putting into context the wealth of research on what makes for effective teaching then building on the foundation by looking at specific aspects of good classroom practice and finally looking at ways of reflecting on experience to improve classroom practice **Teaching Humanities in Primary Schools** Pat Hoodless, Elaine McCreery, Paul Bowen, Sue Bermingham, 2009-09-10 This book supports primary trainees in their learning and teaching approach to the core humanities subjects geography history and religion It promotes an integrated approach to these subject areas and encourages trainees to reflect on the links between subjects across the curriculum from the Early Years Foundation Stage through to Key Stage 2

This edition has been updated to incorporate the revised Professional Standards for the Award of QTS and addresses key initiatives such as Excellence and Enjoyment Every Child Matters and the Primary National Strategy for Literacy and Mathematics

Improving Teaching and Learning in the Humanities Martin Ashley, 2012-10-12 Focuses on religious education history geography and cross curricular planning in the primary school It includes discussion of the purpose of education and how the humanities fit with this purpose with particular reference to the 1998 Education Act and 1994 National Curriculum Review The book deals with the themes of time place values communication responsibilities and decision making These link the chapters and are fully complemented with case studies For each concept there are suggestions for practical classroom activities The reader will find the book invaluable in integrating the subjects across the National Curriculum

EBOOK: Enhancing Primary Science: Developing Effective Cross-Curricular Links Lois Kelly, Di Stead, 2013-02-16 How can other subjects in the primary curriculum enhance the teaching and learning of primary science The key argument in the book is that children's learning is enriched through both discrete subject teaching and cross curricular approaches to the curriculum and that children become more effective learners when they make links between the different subjects This book gives helpful insights into why making effective cross curricular links enriches science and discusses when and how to make effective and authentic links between science and other subjects Each chapter tackles a particular subject and considers how it can enhance science learning through a variety of approaches and a wealth of ideas for the classroom Written in a clear accessible and informative style this book Includes contributions from a range of expert practitioners Provides a good balance between theory and practice Includes practical advice and tasks to help develop your confidence and skill in cross curricular teaching Is illustrated with examples of pupils' voice This book is ideal for students teachers and schools who wish to adopt a cross curricular approach to teaching and enhance their primary science curriculum Contributors Alison Brade Mark Hamill Sharon Harris Shelagh Hendry Alison Hermon Pat Hughes Arthur Kelly Liz Lawrence and Cliff Porter Let this book take you by the hand and guide you skilfully past the pitfalls of cross curricular teaching in primary science whilst enjoying the celebration of creative and effective links between science and other subjects It is full of practical suggestions for cross curricular work but it never loses sight of the need for clear learning goals Rooted in the principles of collaborative learning this book inspires and informs Anne Goldsworthy Independent Science Consultant This important book explores a practical framework for cross curricular teaching of science through a closely referenced theoretical rationale There are a range of open ended tasks that illustrate the rich learning opportunities that can be planned for when expert subject knowledge combines with a pedagogy for enquiry This is an essential read for all teachers inspired to tailor the curriculum to the needs and interests of their children Alison Peacock Headteacher of The Wroxham School and Transformative Learning Alliance Network Leader for the Cambridge Primary Review I enjoyed this book sharing insights into cross curricular approaches to primary science The authors have successfully demonstrated how they have put theory

into practice There are many useful activities clearly outlined for use in the classroom based on the authors own experiences The reader will gain sound knowledge and understanding of how and why cross curricular approaches can enhance primary science through worked examples My particular favourite was the History of Bread I will certainly recommend this book to my students Kathy Schofield Senior Lecturer for Primary Science Manchester Metropolitan University UK These ideas have given me the confidence that cross curricular approaches can enrich scientific provision rather than dilute it Primary School Teacher

Teaching the Primary Curriculum for Constructive Learning Michael Littledyke, Laura Huxford, 2013-10-23 First Published in 1998 There is a current preoccupation with educational standards with claims that overall standards of achievement have fallen The purpose of this book therefore is to address the question of how children learn across the primary National Curriculum subjects with implications for effective teaching approaches The book emphasises a constructivist view of learning which acknowledges that children have views and attitudes which are formed as a result of experiences in and out of school and that these must be taken into account if meaningful and transferable learning is to be achieved

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Debates in Geography Education David Lambert, Mark Jones, 2013 Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues concepts and debates in their
