## **Realms Of Thought:**

**The Realm of Facts** Nicholas Rescher, 2020-01-20 Knowledge of facts is essential for the management of life. Most studies of the subject examine how we go about trying to obtain it; they describe the processes and proceedings of rational inquiry. The present work steps back from this to inquire into the limits and limitations of such processes and to identify the assets and the limitabilities of what they are able to supply for us. It examines how knowledge of facts is secured and consolidated as such and what the resulting information can and cannot provide. It argues that the unavoidable incompleteness of our factual information also endows it with an element of incorrectness. By looking also at the negative side of human inquiry, the book's perspective clarifies the nature of our grip on the facts that constitute our view of the reality of things.

**You Can Have Anything You Want , Paul Tillich and His System of Paradoxical Correlation** Charles Amarkwei, 2020-05-05 This book shows the paradoxical mode by which Christians keep their faith in the Christian message as they relate with science. It reveals how Paul Tillich's method of correlation helps us to understand how Christians interact with science without necessarily conflicting, separating, and dialoguing and synthesizing with each other. It rules out natural theology but provides a non-eclectic theology of nature that frees Christians to be involved in science meaningfully and without undermining their faith.

*Come Along* Jacinta Respondowska, 2010-02-02 *Quest for Confirmation* the second volume of the series *Come Along We Are Truth Bound* is a cross examination of the concepts derived in Volume One: A Dialogue and Dialectic Bridging the Great Epistemic Divides. The cross examination is conducted by means of a dialogue with a representative thinker from each of the related bodies of knowledge. The study reveals reality to be an intricate

harmoniously integrated whole and terminates in An Epistemological Atlas that depicts the major processes of human knowledge in their application to different disciplines The process itself exposes the latter to be the stepping stones of our mind's ascent to the ultimate truth In light of this understanding the unresolved controversies in philosophy gain a new degree of clarity and reveal their relevance to human life This volume a work in epistemology that encompasses human knowledge in general lends itself to different courses but is of special significance to philosophy theology and physics
