## Reason And Nature :

**Nature as Reason** Jean Porter, 2005 This noteworthy book develops a new theory of the natural law that takes its orientation from the account of the natural law developed by Thomas Aquinas as interpreted and supplemented in the context of scholastic theology in the twelfth and thirteenth centuries Though this history might seem irrelevant to twenty first century life Jean Porter shows that the scholastic approach to the natural law still has much to contribute to the contemporary discussion of Christian ethics Aquinas and his interlocutors provide a way of thinking about the natural law that is distinctively theological while at the same time remaining open to other intellectual perspectives including those of science In the course of her work Porter examines the scholastics assumptions and beliefs about nature Aquinas s account of happiness and the overarching claim that reason can generate moral norms Ultimately Porter argues that a Thomistic theory of the natural law is well suited to provide a starting point for developing a more nuanced account of the relationship between specific beliefs and practices While Aquinas s approach to the natural law may not provide a system of ethical norms that is both universally compelling and detailed enough to be practical it does offer something that is arguably more valuable namely a way of reflecting theologically on the phenomenon of human morality *Reason and Nature* Morris R. Cohen, 1953

*Virtue and Reason in Nature* Allen Andrew Thompson, 2005 *Reason in Nature* Matthew Boyle, Evgenia Mylonaki, 2022-12-06 Against the dominant view of reductive naturalism John McDowell argues that human life should be seen as transformed by reason so that human minds while not supernatural are sui generis This collection assembles eleven critical essays that highlight the enduring significance and wide ramifications of McDowell s unorthodox position Kant and the Laws of Nature Michela Massimi, Angela Breitenbach, 2017-03-16 This volume of new essays explores Kant s views on the laws of nature *Women and Nature?* Douglas Vakoch, Sam Mickey, 2017-07-06 Cover Half Title Title Page Copyright Page Table of Contents Acknowledgments Notes on contributors Editor s foreword Part I Overview Introduction 1 Fran oise d Eaubonne and ecofeminism rediscovering the link between women and nature Part II Rethinking animality 2 A retreat on the river bank perpetuating patriarchal myths in animal stories 3 Visual patriarchy PETA advertising and the commodification of sexualized bodies 4 Ethical transfeminism transgender individuals narratives as contributions to ethics of vegetarian ecofeminisms Part III Constructing connections 5 The women nature connection as a key element in the social construction of Western contemporary motherhood 6 The nature of body image the relationship between women s body image and physical activity in natural environments 7 Writing women into back to the land feminism appropriation and identity in the 1970s magazine Part IV Mediating practices 8 Bilha Givon as Sartre s third party in environmental dialogues 9 Yo soy mujer yo soy ecologista Feminist and ecological consciousness at the Women s Intercultural Center 10 The politics of land water and toxins reading the life narratives of three women oikos carers from Kerala 11 Ecofeminism and the telegenics of celebrity in documentary film the case of Aradhana Seth s Dam Age 2003 and the Narmada Bachao Andolan Afterword Index

*Chaos and Cosmos* Karen Lang, 2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky's approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer's contemporaneous publications on the substance and function of scientific concepts and on Einstein's theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe's inspiration for both Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge

**The Power and the Wisdom** John L. McKenzie, 2009-01-01 In the composition of this book I experienced a growing conviction that the thing with which we believe we are familiar is not the New Testament it is a conventionalized popular understanding of the New Testament The simplicity of the New Testament can be deceptive We have lived with it so long that its explosive power has become sweet reasonableness I have noticed this not as a preacher but simply as a professional interpreter It is our office to explain the text The New Testament interpreter finds that he has the unpleasant task of liberating the text from certain encumbrances John L McKenzie from the preface
