Reasonable Risk Alcohol In Perspective:

Reasonable Risk Marjana Martinic, Barbara C. Leigh, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

Reasonable Risk Barbara Leigh, Marjana Martinic, 2004-01-01 Reasonable Risk examines the concept of risk as it applies to everyday life in general and to alcohol consumption specifically The book addresses how we assess risks and benefits and the strategies we use to manage them It examines the elements that shape our perceptions of risk cultural influences social factors and how we are presented with information about risk The final chapter of the book focuses on the role of risk in policy formulation examining in particular how alcohol policies are developed within the context of individual and societal responsibility

Drinking in Context Gerry Stimson, Marcus Grant, Marie Choquet, Preston Garrison, 2013-05-13 Drinking beverage alcohol is a widespread source of individual and social pleasure in most countries around the world Yet some drinking patterns can lead to serious physical mental and social harms Drinking in Context is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes drinking patterns targeted interventions and partnership development An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking As a result there has been a shift towards interventions that address the targeted reduction of harm These approaches recognize socio cultural differences and avoid trying to impose a one size fits all solution In this context multi stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society Shared responsibilities lead to shared solutions

Corporate Social Responsibility and Alcohol Marcus Grant, Joyce O'Connor, 2013-05-13 Increased scrutiny on the part of the general public media and government has warranted a reexamination of corporate responsibilities standards of accountability the company s role in its local and extended community and its ethical position in our society and culture Corporate Social Responsibility and Alcohol considers the basic values ethics policies and practices of a company s business Particular attention will be paid to the alcohol beverage industry and the many unique issues that are specific to this business such as responsible marketing promotional and advertising campaigns and strategies the particular risks inherent in any alcoholic product issues of abuse prevention research and legal and ethical aspects of alcohol This will be the seventh volume in the ICAP Series on Alcohol in Society

Expressions of Drunkenness (Four Hundred Rabbits) Anne Fox, Mike MacAvoy, 2011-01-07 The goal of this book is to contribute to the ongoing scholarly discussion on the very serious topic of drunkenness The phrase four hundred rabbits is one of many illustrations of the deep cultural religious and social influences on how individuals and communities view alcohol intoxication The Aztecs believed alcohol to have a divine origin with a god and goddess giving birth to 400 meaning innumerable in ancient Aztec divine children or rabbit gods each representing a varying degree and expression of alcohol intoxication and drunkenness Hence the book s subtitle which at first glance might seem light hearted but in fact represents

an in depth look at a weighty topic With such rooted sociocultural factors in mind the International Center for Alcohol Policies ICAP and DrinkWise Australia collaborated to prepare a publication that advances current understanding of the individual and collective meanings purposes and functions of drunkenness As the authors explain interpretations by different disciplines of the terms intoxication and drunkenness are often inconsistent The chapters of this book discuss intoxication and drunkenness from three perspectives biological cultural and social By placing intoxication and drunkenness into these contexts the book is able to offer language and conceptual tools to help advance the ongoing discussion on how best to reduce alcohol related harm and encourage responsible enjoyment of beverage alcohol Readers in need of an in depth understanding of the varied dimensions of extreme drunkenness will add this excellent resource to their personal library

Assessment of Risk from Low-Level Exposure to Radiation and Chemicals A. D. Woodhead,2013-11-21 The present workshop had its orlglns in discussions among Alexander Hollaender Oddvar Nygaard Donald Borg Richard Setlow and Victor Bond on the need for a symposium that would deal with a broad spectrum of pressing subjects related to the physics chemistry and biological actions of ionizing radiations and the theoretical and practical problems of risk assessment It soon became apparent that the spectrum of subjects considered was too broad for the desired depth of coverage in fact it seemed

un likely that the conference participants would have the background knowledge to span the gamut Therefore two separate meetings were decided upon the first of which Comparison of Mechanisms of Carcinogenesis by Radiation and Chemical Agents was held at the National Bureau of Standards Gaithersburg on December 6 7 1983 The meeting was sponsored by the NCI The second meeting has emerged as the present workshop at Brookhaven National Laboratory An interface between the two conferences has been provided by Michael Fry and Donald Borg who have summarized the salient points emanating from the NCI Symposium We intended that the first conference should focus on the basic mechanisms of radiation and chemical carcinogenesis while the second the present meeting would emphasize exposure response relationships particularly the theoretical and practical similarities and differences between exposure to chemical carcinogens compared to exposure to ionizing radiation
