Recent Advances on Pain: Pathophysiology and Clinical Aspects John J. Bonica, Paolo Procacci, Carlo A. Pagni, 1974

Pain as Human Experience Mary-Jo DelVecchio Good, Paul Brodwin, Byron J. Good, 1994-11-14 With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors attempt to invent new ways of writing about this language resistant human experience Focused on substantive issues in the study of chronic pain their work explores the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in Pain as Human Experience In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book Jacket

Recent Advances on Pain: Pathophysiology and Clinical Aspects John J. Bonica, Paolo Procacci, Carlo A. Pagni, 1974

Handbook of Pain and Aging David I. Mostofsky, Jacob Lomranz, 2013-11-11 From time to time professional journals and edited volumes devote some of their pages to considerations of pain and aging as they occur among the aged in different cultures and populations One starts from several reasonable assumptions among them that aging per se is not a disease process yet the risk and frequency of disease processes increase with ongoing years The physical body's functioning and ability to restore all forms of damage and insult slow down the immune system becomes compromised and the slow growing pathologies reach their critical mass in the later years The psychological body also becomes weaker with unfulfilled promises and expectations and with tragedies that visit individuals and families and the prospect that whatever worlds remain to be conquered will most certainly not be met with success in the rapidly passing days and years that can only culminate in death Despair and depression coupled with infirmity and sensory and or motor inefficiency aggravate both the threshold and the tolerance for discomfort and synergistically collaborate to perpetuate a vicious cycle in which the one may mask the other Although the clinician is armed with the latest advances in medicine and pharmacology significant improvement continues to elude her or him The geriatric specialist all too familiar with such realities usually can offer little else than a hortative to learn to live with it but the powers and effectiveness of learning itself have declined

"Camp Pain" Jean E. Jackson, 2011-06-07 Pain is the most frequent cause of disability in America And pain specialists estimate that as many as thirty to sixty million Americans suffer from chronic pain

Chronic pain is a complex phenomenon often extremely difficult to treat and surprisingly difficult to define. Just as medical literature in general neglects the experience of illness so the clinical literature on pain neglects the experience of pain. Camp Pain takes an approach different from most studies of chronic pain which are typically written from a medical or social perspective. Based on a year's fieldwork in a pain treatment center, this book focuses on patients' perspectives on their experiences of pain, what these experiences mean to them, and how this meaning is socially constructed. Jackson explores the psychological burden imposed on many sufferers when they are judged not to have real pain and by harsh moral judgments that sufferers are weak, malingering, or responsible in some way for their pain. Jackson also looks at the ways in which severe pain erodes and destroys personal identity, studying in particular the role of language. While keeping her focus on patients' experiences, Jackson explores Western concepts of disease, health, mind and body, assumptions about cause and effect, and notions of shame, guilt, and stigma. Camp Pain does not attempt to resolve the uncertainties and misperceptions associated with pain but rather aims at enhancing our understanding of the wider implications of chronic pain by focusing on the sufferers themselves.

Clinical Behavioral Medicine I.E. Wickramasekera, 1988-03-31. This book is an effort to integrate some clinical observations, theoretical concepts, and promising clinical procedures that relate psychological variables to physiological variables. My primary emphasis is on what psychological and behavioral concepts and procedures are most likely to enable us to influence physiological functions. The book covers questions that have fascinated me and with which I have struggled in daily clinical practice: What types of people are most at risk for physical disorders or dysfunctions? Why do some people present psychosocial conflicts somatically and others behaviorally? What is the placebo effect and how does it work? How do you arrange the conditions to alter maladaptive belief systems that contribute to psychopathology and pathophysiology? Do beliefs have biological consequences? When I was in private clinical practice and even today in my medical school clinical practice situation, I set aside one day each week to puzzle over the theoretical questions that my clinical experience generates. Often isolating these underlying theoretical questions provides guidance into the most relevant empirical literature. I have found that this weekly ritual, which I started in private practice many years ago, appears to increase my clinical efficacy or at least makes clinical work more exciting. I find the unexamined clinical practice hard to endure. Kurt Lewin once said: "There is nothing so practical as a good theory."

Anesthesiology and Pain Management T.H. Stanley, M.A. Ashburn, P.G. Fine, 2012-12-06. Theodore H. Stanley, M.D. *Anesthesiology and Pain Management* contains the Refresher Course manuscripts of the presentations of the 36th Annual Postgraduate Course in Anesthesiology which took place at The Cliff Conference Center in Snowbird, Utah, February 22-26, 1991. The chapters reflect new data and concepts within the general framework of pain research and basic science clinical topics in pain management. The purposes of the textbook are to 1) act as a reference for the anesthesiologists attending the meeting and 2) serve as a vehicle to bring many of the latest concepts in anesthesiology to others within a short time of the formal presentation. Each chapter is a brief but

sharply focused glimpse of the interests in anesthesia expressed at the conference This book and its chapters should not be considered complete treatises on the subjects addressed but rather attempts to summarize the most salient points This textbook is the ninth in a continuing series documenting the proceedings of the Postgraduate Course in Salt Lake City We hope that this and the past and future volumes reflect the rapid and continuing evolution of anesthesiology in the late twentieth century ix list of Contributors Ashburn Michael A Department of Anesthesiology University of Utah Salt Lake City Utah Basbaum Allan Department of Anatomy Physiology University of California San Francisco San Francisco California Bonica John J Department of Anesthesiology The University of Washington Seattle Washington Cousins Michael J **The Opiate Receptors** Gavril Pasternak, 2013-04-17 The growth of the opiate field over the past decade has been enormous Initial interest focused upon the strategic clinical importance of morphine and its analogs but the discovery of the enkephalins and the other endogenous opioid peptides with their widespread actions within brain has expanded the field to investigators in almost all areas of neuroscience as well as pharmacology Unfortunately this field of research with its vast literature has become progressively more complex The receptors are no longer limited to opiates but include many subtypes selective for the opioid peptides Indeed they might be better termed opioid rather than opiate receptors Many controversies have emerged and been settled others remain Early studies must now be interpreted on the basis of current information Thousands of papers examining various aspects of opiates and the endogenous opioids present separate pieces of a large puzzle The goal of this volume is to put the pieces together to give a coherent overview of opiate receptor pharmacology and to provide insights into both the molecular and classical pharmacology of opiates and the opioid peptides The issue of multiple classes of opiate and opioid peptide receptors and their importance in understanding mechanisms of action provides the major focus of the book The study of opiates and opioid peptides provides a unique research opportunity in the neuropharmacology of drug receptors *Reconstructive Neurosurgery* Wen-Ta Chiu, Ming-Chien Kao, Ching-Chang Hung, Shinn-Zong Lin, Han-Jung Chen, Simon F. T. Tang, Barry J.
