Skeleton Keys Riley Black (Brian Switek), 2020-03-03 A provocative and entertaining magical mineral tour through the life and afterlife of bone Wall Street Journal Our bones have many stories to tell if you know how to listen Bone is a marvel an adaptable and resilient building material developed over more than four hundred million years of evolutionary history It gives your body its shape and the ability to move It grows and changes with you an undeniable document of who you are and how you lived Arguably no other part of the human anatomy has such rich scientific and cultural significance both brimming with life and a potent symbol of death In this delightful natural and cultural history of bone Brian Switek explains where our skeletons came from what they do inside us and what others can learn about us when these artifacts of mineral and protein are all we've left behind Bone is as embedded in our culture as it is in our bodies Our species has made instruments and jewelry from bone treated the dead like collectors items put our faith in skull bumps as guides to human behavior and arranged skeletons into macabre tributes to the afterlife Switek makes a compelling case for getting better acquainted with our skeletons in all their surprising roles Bridging the worlds of paleontology anthropology medicine and forensics **Skeleton Keys** illuminates the complex life of bones inside our bodies and out

Advances in Forensic Taphonomy William D. Haglund, Marcella H. Sorg, 2001-07-30 Liberally illustrated with photographs maps and other images **Advances in Forensic Taphonomy Method Theory and Archaeological Perspectives** offers modern techniques for obtaining clues from postmortem evidence This bestselling reference examines techniques in recovery and analysis coverage of mass grave investigation applications of nuclear and mitochondrial DNA techniques interpretation of burned human remains the discrimination of trauma from postmortem change and taphonomic interpretation of water deaths both at the scene and in the lab It also discusses microenvironmental variation and decomposition in different environments as well as geochemical and entomological analysis

Spying on Whales Nick Pyenson, 2019-06-25 A palaeontological howdunnit **Spying on Whales** captures the excitement of seeking answers to deep questions in cetacean science Nature Called the best of science writing Edward O Wilson and named a best book by Popular Science a dive into the secret lives of whales from their four legged past to their perilous present Whales are among the largest most intelligent deepest diving species to have ever lived on our planet They evolved from land roaming dog sized creatures into animals that move like fish breathe like us can grow to 300 000 pounds live 200 years and travel entire ocean basins Whales fill us with terror awe and affection yet there is still so much we don't know about them Why did it take whales over 50 million years to evolve to such big sizes and how do they eat enough to stay that big How did their ancestors return from land to the sea and what can their lives tell us about evolution as a whole Importantly in the sweepstakes of human driven habitat and climate change will whales survive Nick Pyenson's research has given us the answers to some of our biggest questions about whales He takes us deep inside the Smithsonian's unparalleled fossil collections to frigid Antarctic waters and to the arid desert in

Chile where scientists race against time to document the largest fossil whale site ever found Full of rich storytelling and scientific discovery *Spying on Whales* spans the ancient past to an uncertain future all to better understand the most enigmatic creatures on Earth *A Companion to Forensic Anthropology* Dennis Dirkmaat, 2015-04-20 *A Companion to Forensic Anthropology* presents the most comprehensive assessment of the philosophy goals and practice of forensic anthropology currently available with chapters by renowned international scholars and experts Highlights the latest advances in forensic anthropology research as well as the most effective practices and techniques used by professional forensic anthropologists in the field Illustrates the development of skeletal biological profiles and offers important new evidence on statistical validation of these analytical methods Evaluates the goals and methods of forensic archaeology including the preservation of context at surface scattered remains buried bodies and fatal fire scenes and recovery and identification issues related to large scale mass disaster scenes and mass grave excavation **Taphonomy** Peter A. Allison, David J. Bottjer, 2010-11-03 Taphonomic bias is a pervasive feature of the fossil record A pressing concern however is the extent to which taphonomic processes have varied through the ages It is one thing to work with a biased data set and quite another to work with a bias that has changed with time This book includes work from both new and established researchers who are using laboratory field and data base techniques to characterise and quantify the temporal and spatial variation in taphonomic bias It may not provide all the answers but it will at least shed light on the right questions

Zooarchaeology Elizabeth J. Reitz, Elizabeth S. Wing, 1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analysing animal remains from archaeological sites Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments especially site formation processes subsistence strategies and paleoenvironments The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these There are extensive references and illustrations to help in the process of identification *Forensic Dentistry* Paul G. Stimson, Curtis A. Mertz, 2002-01-01 Identification of unknown individuals and the determination of their age race and sex is one of the most important functions of forensic dentistry Throughout history this procedure has been used to establish difficult identifications including Adolph Hitler Eva Braun Lee Harvey Oswald and actor William Holden Other essential applications of forensic dentistry include mass disaster investigations evaluating bite marks and bitemark evidence in death investigations child abuse investigations and in civil litigation for evaluating oral or temporomandibular injuries related to accidents This book explains these procedures in a comprehensive way that takes you step by step through the world of forensic dental investigations The areas of forensic dentistry have come a long way in recent years New and unique discussions offer information that will benefit professionals faced with many of the current aspects of the science

Topics include how to deal with a trial or an aggressive attorney and how to assess buried crime scene evidence the application of forensic geotaphonomy in forensic archaeology Forensic Dentistry illustrates the proper handling and evaluation of dental evidence Its broad coverage also includes important information for legal and police science professionals who must properly evaluate and present dental findings This book covers all standard examination practices of dental evidence including identification of unknown individuals age race sex Whether you are a medical examiner or a pathologist who needs to know about the proper handling and evaluation of dental evidence a legal or police science professional who needs to know how to deal with the proper presentation of dental findings in a court of law or a dentist who wants to use your training and experience in a unique interesting and challenging way this book is for you **Taphonomy**

Ronald E. Martin, 1999-10-28 Taphonomy A Process Approach is the first book to review the entire field of taphonomy or the science of fossil preservation It describes the formation of animal and plant fossils in marine and terrestrial settings and how this affects deciphering the ecology and extinction of past lifeforms and the environments in which they lived The volume emphasises a process approach to taphonomy and reviews the taphonomic behaviour of all important taxa plant and animal It will be useful to anyone interested in the preservation of fossils and the formation of fossil assemblages but it is aimed primarily at advanced students and professionals working in paleontology stratigraphy sedimentology climate modeling and biogeochemistry
