Recent Trends in Algebraic Development Techniques Phillip James, Markus

Roggenbach,2017-12-07 This book constitutes the thoroughly refereed post conference proceedings of the 23rd IFIP WG 1.3 International Workshop on Algebraic Development Techniques WADT 2016 held in September 2016 in Gregynog UK. The 9 revised papers presented together with two invited talks, one invited paper and two survey papers were carefully reviewed and selected from numerous submissions and focus on foundations of algebraic specification, other approaches to formal specification including process calculi and models of concurrent distributed and mobile computing, specification languages, methods and environments, semantics of conceptual modeling methods and techniques, model driven development, graph transformations, term rewriting and proof systems, integration of formal specification techniques, formal testing and quality assurance, validation and verification areas broadly falling into three categories: multimedia content analysis, multimedia signal processing and communications, and multimedia applications and services. *Recent Trends in Algebraic Development Techniques* Francesco Parisi-Presicce,1998-03-11 This book constitutes the strictly refereed post workshop proceedings of the 12th International Workshop on Algebraic Development Techniques WADT 98 held in Tarquinia, Italy, in June 1997. This book presents besides three invited surveys 21 carefully revised full papers selected from 40 presentations given at the workshop. The algebraic approach to the specification and development of systems, born as a formal method for abstract data types, encompasses today the formal design of integrated hardware and software systems, new specification frameworks and a wide range of applications. This book presents the state of the art in the area of algebraic software development. **Recent Trends in Algebraic Development Techniques** Andrea Corradini, Ugo Montanari,2009-08-29 This book constitutes the thoroughly refereed post conference proceedings of the 19th International Workshop on Recent Trends in Algebraic Development Techniques WADT 2008 held in Pisa, Italy, on June 13-16, 2008. The 18 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 33 presentations at the workshop. The papers focus on the algebraic approaches to the specification and development of systems and address topics such as formal methods for system development, specification languages and methods, systems and techniques for reasoning about specifications, specification development systems, methods and techniques for concurrent distributed and mobile systems and algebraic and co-algebraic foundations. *Recent Trends in Algebraic Development Techniques* Markus Roggenbach,2021-04-10 This book constitutes the thoroughly refereed post conference proceedings of the 25th International Workshop on Algebraic Development Techniques WADT 2020 held virtually in April 2020. The 7 revised papers presented together with an invited paper were carefully reviewed and selected from 9 submissions. The contributed presentations covered a range of topics about the algebraic approach to system specification, which encompasses many aspects of the formal design of software systems. Originally born as formal method for reasoning about abstract data types, the algebraic approach now covers new specification frameworks and programming paradigms such as object oriented, aspect oriented, agent oriented, logic and higher order functional programming, as well as a wide range of application areas including

,1999 **Recent Trends in Algebraic Development Techniques** Jose L. Fiadeiro,1999-07-28 The European conference situation in the general area of software science has long been considered unsatisfactory. A fairly large number of small and medium sized conferences and workshops take place on an irregular basis competing for high quality contributions and for enough attendees to make them financially viable. Discussions aiming at a consolidation have been underway since at least 1992 with concrete planning beginning in summer 1994 and culminating in a public meeting at TAPSOFT 95 in Aarhus. On the basis of a broad consensus it was decided to establish a single annual federated spring conference in the slot that was then occupied by TAPSOFT and CAAP ESOP CC comprising a number of existing and new conferences and covering a spectrum from theory to practice. ETAPS 98 the first instance of the European Joint Conferences on Theory and Practice of Software is taking place this year in Lisbon. It comprises five conferences: FoSSaCS, FASE, ESOP, CC, TACAS, four workshops: ACoS, VISUAL, WADT, CMCS, seven invited lectures and nine tutorials. *Recent Trends in Algebraic Development*

of Algebraic Specification and Formal Software Development Donald Sannella, Andrzej Tarlecki,2012-01-05 This book provides foundations for software specification and formal software development from the perspective of work on algebraic specification concentrating on developing basic concepts and studying their fundamental properties. These foundations are built on a solid mathematical basis using elements of universal algebra, category theory and logic and this mathematical toolbox provides a convenient language for precisely formulating the concepts involved in software specification and development. Once formally defined these notions become subject to mathematical investigation and this interplay between mathematics and software engineering yields results that are mathematically interesting, conceptually revealing and practically useful. The theory presented by the authors has its origins in work on algebraic specifications that started in the early 1970s and their treatment is comprehensive. This book contains five kinds of material: the requisite mathematical foundations, traditional algebraic specifications, elements of the theory of institutions, formal specification and development.

and proof methods While the book is self contained mathematical maturity and familiarity with the problems of software engineering is required and in the examples that directly relate to programming the authors assume acquaintance with the concepts of functional programming The book will be of value to researchers and advanced graduate students in the areas of programming and theoretical computer science **Recent Trends in Algebraic Development Techniques** Mihai
