Husserl and Heidegger Through a critical discussion including practically all previously published English and German literature on the subject the aim is to present a thorough and evenhanded account of the relation between the two The book provides a detailed presentation of their respective projects and methods and examines several of their key phenomenological analyses centering on the phenomenon of being in the world It offers new perspectives on Husserlian and Heideggerian phenomenology e g concerning the importance of Husserl s phenomenology of the body the relationship between the Husserlian concept of constitution and Heidegger s notion of transcendence as well as in its argument that being designates the central phenomenon for both phenomenologists Though the study sacrifices nothing in terms of argumentative rigor or interpretative detail it is written in such a way as to be accessible and rewarding to non specialists and specialists alike *The Foundations of Phenomenological Psychotherapy* Giampiero Arciero, Guido Bondolfi, Viridiana Mazzola, 2018-05-30 This book addresses selected central questions in phenomenological psychology a discipline that investigates the experience of self that emerges over the course of an individual s life while also outlining a new method the formal indication as a means of accessing personal experience while remaining faithful to its uniqueness In phenomenological psychology the psyche no longer refers to an isolated self that remains unchanged by life s changing situations but is rather a phenomenon ipseity which manifests itself and constantly takes form over the course of a person s unique existence Thus the formal indication allows us to study the way in which ipseity relates to the world in different situations in a way that holds different meanings for different people Based on this new approach phenomenological psychotherapy marks a transition from a mode of grasping the truth about oneself through reflection to a mode of accessing the disclosure of self through a work of self transformation the care of self that requires the person to actually change her position on herself By putting forward this method the authors shed new light on the dynamic interplay between a person s historicity and uniqueness on the one hand and the related physiopathological mechanisms on the other providing evidence from the fields of genetics cardiology the neurosciences and psychiatry The book will appeal to a broad readership from psychiatrists psychologist and psychotherapists to researchers in these fields *Revue roumaine de philosophie* ,2006

Philosophie des mathématiques Jean-Michel Salanskis, 2008 R flexions sur les rapports et les limites entre philosophie et math matique *The Inhuman Condition* Rudi Visker, 2006-01-27 At the origin of this volume a simple question what to make of that surprisingly monotonous series of statements produced by our societies and our philosophers that all converge in one theme the importance of difference To clarify the meaning of the difference at stake here we have tried to rephrase it in terms of the two major and mutually competing paradigms provided by the history of phenomenology only to find both of them equally unable to accommodate this difference without violence Neither the ethical nor the ontological approach can account for a subject that insists on playing a part of its own rather than following the script provided for it by either Being or the Good What appears to be from a Heideggerian or Levinasian perspective an unwillingness to open up to what offers to

deliver us from the condition of subjectivity is analysed in these pages as a structure in its own right Far from being the wilful indifferent and irresponsible being its critics have portrayed it to be the so called postmodern subject is essentially finite not even able to assume the transcendence to which it owes its singularity This inability is not a lack it points instead to a certain unthought shared by both Heidegger and Levinas which sets the terms for a discussion no longer our own Instead of blaming Heidegger for underdeveloping being with we should rather stress that his account of mineness may be in the light of contemporary philosophy what stands most in need of revision And instead of hailing Levinas as the critic whose stress on the alterity of the Other corrects Heidegger's existential solipsism the problems into which Levinas runs in defining that alterity call for a different diagnosis and a corresponding change in the course that phenomenology has taken since Instead of preoccupying itself with the invisible we should focus on the structures of visibility that protect us from its terror The result An account of difference that is neither ontological nor ethical but meta-ontological and that can help us understand some of the problems our societies have come to face racism sexism multiculturalism pluralism And in the wake of this an unexpected defence of what is at stake in postmodernism and in the question it has refused to take lightly who are we Finally an homage to Arendt and Lyotard who if read through each other's lenses give an exact articulation to the question with which our age struggles how to think the human condition once one realizes that there is an inhuman side to it which instead of being its mere negation turns out to be that without which it would come to lose its humanity

Rediscovering

Phenomenology Luciano Boi, Pierre Kerszberg, Frédéric Patras, 2007-07-18 This book proposes a new phenomenological analysis of the questions of perception and cognition which are of paramount importance for a better understanding of those processes which underlies the formation of knowledge and consciousness It presents many clear arguments showing how a phenomenological perspective helps to deeply interpret most fundamental findings of current research in neurosciences and also in mathematical and physical sciences

De L'éthique à la Justice Ernst Wolff, 2007-10-02 Emmanuel Levinas est le philosophe de la non indifférence il n'est en aucune sorte un philosophe indifférent Son inquiétude personnelle et engagement politique ont trouvé une expression philosophique dans une œuvre à deux versants Dans le versant ontologique il cherche à montrer que même si l'homme est l'élément de compréhension de l'être tout l'homme et toute signification ne se réduisent pas à la compréhension de l'être seul Dans le versant politique il s'interroge sur la possibilité de soumettre la tendance totalitaire de toute politique à une recherche de justice qui ne dépend pas finalement de la politique même Mais ces deux versants ne forment qu'un La découverte d'une signification qui excède la compréhension de l'être l'éthique fournit en même temps la source de renouvellement de la justice Ainsi par cette double question Levinas nous présente les fils conducteurs de notre enquête une signification au-delà de la compréhension de l'être et sa portée éthique que nous appelons langage et que nous explorons dans la perspective de son importance politique Les études analytiques dans lesquelles les notions de politique et de langage fonctionnent comme clef d'interprétation mutuelle débouchent sur une critique centrée sur deux problèmes l'impossibilité

Crisis and Reflection J. Dodd, 2006-01-12 In his last work *Crisis of the European Sciences and Transcendental Phenomenology* Edmund Husserl formulated a radical new approach to phenomenological philosophy Unlike his previous works in the *Crisis* Husserl embedded this formulation in an ambitious reflection on the essence and value of the idea of rational thought and culture a reflection that he considered to be an urgent necessity in light of the political social and intellectual crisis of the interwar period In this book James Dodd pursues an interpretation of Husserl's text that emphasizes the importance of the problem of the origin of philosophy as well as advances the thesis that for Husserl the crisis of reason is not a contingent historical event but a permanent feature of a life in reason generally

Lifetime M.S. Frings, 2003-04-30 Using posthumous manuscripts the author shows that Scheler conceived the origin of time in the self-activating center of individual and universal life as threefold absolute time of a four-dimensional expanse This serves as a basis for establishing the phenomenon of objective time in multiple steps of constitutionality including the physical field theory and theory of relativity
