**Democratic Education and the Teacher-As-Prophet** Jeffery Dunn, 2018-06-28 This volume aims to reveal how Dewey's notion of the religious

understood as faith in the human relational condition offers a way to think differently about the aims and purposes of education After exploring the effects of neoliberal conceptions of schooling against broader democratic forms of education this book suggests that Dewey s vision of the teacher as prophet is a useful model for positioning teachers as agents of social change By catalysing the religious work of schools understood not as teaching religion but as a process of social unification the Deweyan teacher as prophet can stimulate experimentation towards a democratic ideal of schooling

Green and the Development of Ethical Socialism Matt Carter,2016-11-16 This book uncovers the philosophical foundations of a tradition of ethical socialism best represented in the work of R H Tawney tracing its roots back to the work of T H Green Green and his colleagues developed a philosophy that rejected the atomistic individualism and empiricist assumptions that underpinned classical liberalism and helped to found a new political ideology based around four notions the common good a positive view of freedom equality of opportunity and an expanded role for the state The book shows how Tawney adopted the key features of the idealists philosophical settlement and used them to help shape his own notions of true freedom and equality thereby establishing a tradition of thought which remains relevant in British politics today

Indian Stereotypes in TV Science Fiction Sierra S. Adare,2009-08-17 According to an early 1990s study 95 percent of what college students know about Native Americans was acquired through the media leading to widespread misunderstandings of First Nations peoples Sierra Adare contends that negative Indian stereotypes do physical mental emotional and financial harm to First Nations individuals At its core this book is a social study whose purpose is to explore the responses of First Nations peoples to representative Indian stereotypes portrayed within the TV science fiction genre Participants in Adare s study viewed episodes from My Favorite Martian Star Trek Star Trek Voyager Quantum Leap The Adventures of Superman and Star Trek The Next Generation Reactions by viewers range from optimism to a deep rooted sadness The strongest responses came after viewing a Superman episode s depiction of an evil medicine man who uses a ceremonial pipe to kill a warrior The significance of First Nations peoples responses and reactions are both surprising and profound After publication of Indian Stereotypes in TV Science Fiction ignorance can no longer be used as an excuse for Hollywood s irresponsible depiction of First Nations peoples culture traditions elders religious beliefs and sacred objects

**Citizenship** Bryan S. Turner,Peter Hamilton,1994 SECTION 2 THE CLASSICS      **Human Behavior in the Social Environment** Anissa Taun Rogers,2016-04-14 This addition to Anissa Rogers bestselling Human Behavior in the Social Environment expands the original text with new chapters on spirituality families and groups organizations and communities Written in the compact concise manner of the original text the new chapters cover mezzo and macro contexts and offer additional material valuable to two and three semester HBSE courses      **Instinct in Man** James Drever,1917      *Making Good the Claim* Rufus Burrow,2016-02-16 The Church of God Reformation Movement founded in 1881 has the distinction of having been founded on the two core principles of holiness and visible unity Standard histories of the group proudly argue that the founder and pioneers exhibited a zeal for interracial unity that began to wane only in the early years of the twentieth century This book rejects that claim and argues instead that little to no extant hard evidence supports that view Moreover

Making Good the Claim argues that while blacks eagerly joined the group they did so not because whites expended much energy evangelizing among them but because they heard something deeper in the message of holiness and visible unity than God's expectation that members achieve spiritual and church unity. Unlike most whites blacks interpreted the message to call for unity along racial lines as well. This book challenges members of the Church of God to begin forthwith to make good their historic claim about holiness and visible unity particularly as it applies to interracial unity. Marxism, Communism, and Western Society: Principle Claus Dieter Kernig, 1972 Malaysian Christians Online Meng Yoe Tan, 2020-02-26 Many facets of social life are now intrinsically linked to the Internet through increasing dependence of user centric platforms like blogs social networking websites online forums and open source websites. The Malaysian Church is not exempt from having to negotiate with an increasingly tech savvy and networked community of believers. Based primarily on Internet ethnography and interviews with Christian bloggers and church pastors this book looks at how the Internet is a component of everyday religion in the lives of Malaysian Christians at individual institutional and national levels. It examines the ways in which online Christian expressions are increasingly integrated into the everyday religious routines of Christians for the development of their personal identities and inter religious interactions. This book also shows how the spiritual authority of church pastors can be both challenged and reinforced through the creative use of online tools. It addresses some of the creative ways in which Christians utilise the Internet to engage with national socio political issues within the context of restrictive and controlled mainstream media as well as the ongoing discourse with Islam in the country. Through a selection of case studies this book shows that while the Internet may be free the users of the Internet are not necessarily so. While the Internet has provided Malaysian Christians with new tools to experience their faith in new ways several aspects of old offline socio cultural habits persist online. These in turn lead to a robust and growing environment of Internet Christianity in Malaysia. This timely book will be of interest to scholars in religious studies media and communications and cultural studies in Southeast Asia. The Sociocultural Context of Psychosocial Interventions Francisco José Eiroa-Orosa, Tim Lomas, Michael Rowe, 2018-12-06 Across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life. Indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales. However few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i.e. considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics. The aim of the Research Topic The Sociocultural Context of Psychosocial Interventions was to address this lacuna. As such we tried to help bringing a more contextual mindset to the implementation of health and wellbeing interventions. This may help to shift the way such interventions are designed and implemented both at a granular local level i.e. influencing individual practitioners and at a large scale macro level e.g. influencing policy makers. Themes within this

Research Topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels There has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime Some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests For us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion Rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences For the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation

**Prophets and Photons** Benjamin E Zeller, 2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith By the twentieth century established religious traditions were forced to grappled with the challenges presented by scientific knowledge and innovation But emerging religions still led by a living founder to guide them found new ways to respond to science The Hare Krishnas the Unification Church and Heaven s Gate each found distinct ways to incorporate major findings of modern American science understanding it as central to their wider theological and social agendas In *Prophets and Photons* Benjamin Zeller examines how these New Religious Movements NRMs crafted their views on science during their founding period and how those views evolved over time These NRMs shed light on how religious groups new old alternative or mainstream could respond to the tremendous growth of power and prestige of science in late twentieth century America In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world
