## Religion Of Science:

*Religion and Science* Ian G. Barbour, 2013-02-12 Religion and Science is a definitive contemporary discussion of the many issues surrounding our understanding of God and religious truth and experience in our scientific age This is a significantly expanded and freshly revised version of Religion in an Age of Science winner of the American Academy of Religion Award for Excellence and the Templeton Book Award Ian G Barbour the premier scholar in the field has added three crucial historical chapters on physics and metaphysics in the seventeenth century nature and God in the eighteenth century and biology and theology in the nineteenth century He has also added new sections on developments in nature centered spirituality information theory and chaos and complexity theories **The Religion of Science** William Hamilton Wood, 1922 *The Religion of Science* William Hamilton Wood, 2015-02-25 From the INTRODUCTION The religious situation in America to day seems far from being ideal On the surface there is criticism pessimism belligerency neglect or honest bewilderment The reasons for these conditions are not primarily moral as in the days of the Wesleys in England but intellectual This term intellectual is used in the sense of beliefs and would express the fact that men of to day are searching for religious truth which they can believe We believe that there is present to day among us an active idealism and moral qualities of inestimable value But we feel hampered because of the absence of absorbing captivating soul stirring religious beliefs The sources of this situation are plainly discernible The middle of the last century marks the beginning of present religious thinking At that time there was a distinct uniformity in the presentation of what Christianity is and teaches The main items were Hell fire eternal damnation the inspiration of the Bible no salvation for the heathen salvation by faith the grace of God sin baptism and heaven for those who believed and were faithful Salvation was individual and not social To doubt was one of the greatest of sins A spirit of unrest and of revolt began then to express itself which when fortified by the acquisition of new knowledge has been functioning ever since The concrete evidence of the working of this new spirit is the presence of the many varieties of present day isms There is the Mental Science movement initiated by P Quimby now manifest in its two large branches Christian Science and New Thought There is Spiritualism Mormonism and all the others But the three movements which have profoundly influenced religious thinking are Evolution the Higher Criticism and Socialism The year 1859 witnessed the rebirth of the idea evolution and the revamping of the theory into its distinctive form organic evolution The conquest of this idea and theory has been phenomenal and has extended far beyond what sober scientists could have foreseen The epochal moment in relation to religious thinking came when some men of science determined to leave their own field and venture into metaphysics philosophy and even theology These thinkers determined upon the establishment of science as one of the big three theology philosophy science This goal was reached but the accomplishment of the aim only seemed to whet the appetite for further conquest As in the case of the camel and the tent when science once found its head inside the tent of the intellectuals it decided to occupy the whole tent Instead of being

satisfied with a science theology claim was made to the whole of theology and religion A religion of science ensued which has now arrived at the point where it is declared to be the real Christianity Unlike Christian Science this new religion decided against external forms and organization and elected to live in and control modern religious thinking This inner life was possible because it has become the fashion to accept evolution uncritically It is almost taking one's life in his hands to venture a critical examination of this modern fetish Unless however we mistake the signs of the times there is setting in a strong tide away from this uncritical and worshipful attitude This tendency is more marked among philosophers and the true scientists than among the religious scholars and leaders The times now call for a religious and moral evaluation of the principles of science and the theory of evolution upon which this religion of science is based

The Religion of Science Paul Carus,1913 *The Big Questions in Science and Religion* Keith Ward,2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers
